GENERAL INFORMATION

A. CONCURRENCE:

The Municipal Utilities Commission of the Village of Hamilton (Village of Hamilton or the Commission) concurs in and agrees to abide by the rules and regulations as set forth in the generic tariff filed by the New York Municipal Power Agency (NYMPA) in Case No. 97-E-1575.

B. TERRITORY TO WHICH SCHEDULE APPLIES:

These rates, rules and regulations are applicable to the Municipal Utilities Commission of the Village of Hamilton and that portion of the Towns of Hamilton, Madison, Eaton, and Lebanon served under franchises granted to the Municipal Utilities Commission of the Village of Hamilton.

SERVICE CLASSIFICATION NO. 1

Residential

APPLICABLE TO USE OF SERVICE FOR:

Single-phase residential purpose usage in an individual residence; in an individual flat or individual apartment in a multiple-family dwelling; for residential purposes in a rooming house where not more than four (4) rooms are available for rent; and for single-phase farm service when supplied through the farm residence meter; use exclusively in connection with religious purposes by corporations or associations organized and conducted in good faith for religious purposes, and including the operation by such corporation or association of a school, notwithstanding that secular subjects are taught at such school; for single-phase service exclusively in connection with a community residence as defined in subdivision 28, 28A, or 28B of Section 1.03 of the Mental Hygiene Law, provided that such residence is operated by a not-for-profit corporation and if supervisory staff is on site on a twenty-four hour per day basis that the residence provides living accommodations for fourteen or fewer residents; and use for any post or hall owned or leased by a not-for-profit organization that is a veterans organization.

CHARACTER OF SERVICE:

Continuous, single-phase alternating current at approximately sixty hertz; 120/240 volts or 120/208 volts, as available (nominal), depending upon the characteristics of the load and the circuit from which service is supplied.

MONTHLY RATE:

	<u>Rate</u>
Customer charge	\$2.64
<u>Non-Winter Rate (May through October)</u>	
Energy charge, per kWh	\$0.0351
<u>Winter Rate (November through April)</u>	
Energy charge, per kWh

FACTOR OF ADJUSTMENT:

The factor of adjustment pursuant to Rule IX.D of the NYMPA generic tariff is 1.0612.

PURCHASED POWER ADJUSTMENT:

All kilowatt-hours sold under this service classification shall be subject to Purchased Power Adjustment Charge in accordance with Section VIII of the Village of Hamilton Tariff and consistent with Rule IX of the NYMPA generic tariff.

MINIMUM CHARGE:

The minimum charge is the customer charge.

TERMS OF PAYMENT:

All bills are due when rendered. Full payment must be received on or before the date shown on the bill to avoid a late payment charge of 1.5% as provided in Rule VIII of the NYMPA generic tariff.

TERM:

Open order. Service may be disconnected at the request of the customer by presentation of seventy-two (72) hours notice and payment of the minimum charge for the remainder of the billing period.

SERVICE CLASSIFICATION NO.1 (CONT'D)
Residential

MULTI-FAMILY DWELLINGS:

Where two or more families with separate cooking facilities occupy a residential dwelling, the wiring shall be so arranged that the service to each dwelling unit is metered and billed separately. All common service facilities (i.e. passageways, stairs, heating, air conditioning, general area lighting, etc.) serving occupants of a multi-family dwelling shall be separately metered and shall be classified as a commercial service and billed under that rate schedule. Any private dwelling, individual flat, or apartment in which there resides more than five unrelated persons, exclusive of servants or temporary gratuitous guests, shall be classified as a commercial establishment and billed accordingly.

SERVICE CLASSIFICATION NO. 2
General Service - Non-demand Metered

APPLICABLE TO USE OF SERVICE FOR:

Applicable to the use of service for commercial, business, educational facilities and institutions, small industrial power and energy installations, multi-family or multiple dwellings not covered in Service Classification No. 1.

All energy shall be taken at one point of service and through a single meter for an individual customer or, if there is more than one individual customer in a single structure, the energy shall be taken at one (1) point of service and through a single meter for each individual customer. Each individual meter shall be billed separately, in accordance with the rate schedule.

Service under this classification is not available for resale, auxiliary, or standby service of any type.

This rate is available for total requirements customers with monthly consumption of 6,000 kilowatt-hours (kWh) or less. Customers who consume in excess of 6,000 kWh per month over three consecutive months shall be transferred to service classification 3 and shall remain in service classification 3 for a period of no less than twelve (12) months.

This rate is applicable for all commercial service meeting the above definition and located within the area served by the Commission.

CHARACTER OF SERVICE:

Continuous alternating current at approximately sixty hertz; at the nominal voltages. of 120/240 or 120/208 single phase or 120/208 or 277/480 volts three phase, depending upon the characteristics of the load, the supply circuit, and as available from suitable facilities of adequate capacity adjacent to the premises to be served. 120/240 volts, three phase "delta" service will only be made available from presently existing transformer locations and will not be available if an increase in transformer capacity or a new transformer location is required.

SERVICE CLASSIFICATION NO. 3

General Service - Demand Metered

APPLICABLE TO USE OF SERVICE FOR:

Applicable to the use of service by large commercial, institutional, and industrial customers located within the area served by the Commission for, but not limited to, power and lighting. This rate is available for total requirements customers who, for any three consecutive months, have a monthly consumption in excess of 6,000 kilowatt-hours (kWh) and demand in excess of 10 kilowatts (kW). This rate is also available for those customers who require demand metering to be installed on their premises.

All energy shall be taken at one point of service and through a single meter for an individual customer or, if there is more than one individual customer in a single structure, the energy shall be taken at one (1) point of service and through a single meter for each individual customer. Each individual meter shall be billed separately in accordance with the rate schedule.

Service under this classification is not available for resale, auxiliary, or standby service of any type.

CHARACTER OF SERVICE:

Continuous alternating current at approximately sixty hertz; at the nominal voltages of 120/240 or 120/208 single-phase or 120/208 or 277/480 volts three phase, depending upon the characteristics of the load, the supply circuit, and as available from suitable facilities of adequate capacity adjacent to the premises to be served. 120/240 volts, three phase "delta" service will only be made available from presently existing transformer locations and will not be available if transformer capacity or a new transformer location is required.

SERVICE CLASSIFICATION 3 (CONT'D)
General Service - Demand Metered

DETERMINATION OF DEMAND:

The demand used for billing shall be taken as the greater of:

- A. The design demand agreed to, or
- B. The greatest kW integrated demand metered over a fifteen (15) minute period measured during the billing period, or
- C. Three-quarters (3/4) of the highest kW demand occurring during any of the preceding eleven (11) months.

TERMS OF PAYMENT:

All bills are due when rendered. Full payment must be received on or before the date shown on the bill to avoid a late payment charge of 1.5% as provided in Rule VIII of the NYMPA generic tariff.

TERM:

One year. Thereafter, service may be disconnected at the request of the customer by presentation of thirty (30) days notice and payment of the minimum charge for the remainder of the billing period, if any.

After the term of one year within this service classification, a customer may be moved into Service Classification No. 2 if both the customer's energy consumption and demand fall below 6,000 kWh per month and 10 kW respectively for any three consecutive months.

FACTOR OF ADJUSTMENT:

The factor of adjustment pursuant to Rule IX.D of the NYMPA generic tariff is 1.0612.

PURCHASED POWER ADJUSTMENT:

All kilowatt-hours sold under this service classification shall be subject to Purchased Power Adjustment Charge in accordance with Section VIII of the Village of Hamilton Tariff and consistent with Rule IX of the NYMPA generic tariff.

SPECIAL PROVISIONS:

- A. The Commission shall furnish, install, own, operate, and maintain an enclosed photo-electrically controlled luminaires complete with a bracket of not less than thirty (30) inches in length, ballast, and lamp at the wattage designated under the desired rate charge. The Commission shall also provide a cable service span of one hundred (100) feet which shall be connected on the line side of the customer's meter. Where the service span exceeds one hundred feet, the customer shall pay for the additional cable used.
- B. The lighting unit shall be installed only upon private property owned or leased by the customer. The customer shall furnish the necessary pole or other support, except as hereinafter provided. The Commission reserves the right to require a mounting height which will provide proper light distribution from the unit. Where a pole is appropriately located on the premises, the Commission will waive the requirement that the support be furnished by customer and shall install the unit on its own pole.
- C. Upon request of the customer, the Commission will change the location of the lighting unit, providing that a proper support is furnished and the customer agrees to pay the Commission for the cost incurred in making the change.
- D. Lighting service will be provided every night and all night during the period covering approximately the hours between thirty (30) minutes after sunset and thirty (30) minutes before sunrise, aggregating about 4,200 hours per year, unless prevented by accidents or other causes beyond the control of the Commission.
- E. The customer shall notify the Commission whenever the lamp shall become extinguished or out of service for any reason and the Commission shall replace the lamp and/or make the necessary repairs with reasonable promptness.
- F. This agreement is subject to cancellation in the event that maintenance or lamp replacement becomes excessive due to vandalism or other causes.

CHARGES

A. RECONNECTION CHARGE:

When service has been discontinued, either by the Municipality as provided in Rule XIII of the NYMPA generic tariff or at the request of the consumer and the same consumer applies for reconnection of service at the same premises within four (4) months, there shall be a reconnection charge payable before service will be reestablished, in the amounts as follows:

\$15.00 during regular working hours of the Electric Department, Monday through Friday;

\$30.00 after the regular working hours of the Electric Department, Monday through Friday; and Saturday, Sunday, and Holidays.

B. INSUFFICIENT FUNDS CHECK CHARGE:

Any checks received in payment for electric service which are returned to the Municipality for insufficient funds or are otherwise dishonored by the bank, shall bear a nonrecurring charge of \$10.00 for each check that has to be processed by the Municipality. If two checks have been returned by the bank, the customer who issued the dishonored checks may be required by the Municipality to render future payments by cash, money order, certified or cashier's check.

Post-dated checks shall be returned to the customer as invalid for the transaction.

Only United States currency shall be accepted for payment of accounts due the Municipality.

SUPERSEDING REVISION: 0

PURCHASED POWER ADJUSTMENT CHARGE

APPLICABILITY

All customers receiving service under any of the Village's Electric Department Service Classifications are subject to purchased power adjustment charge ("PPAC").

ADJUSTMENT CHARGE

The PPAC shall be the amount which shall be added to each kilowatt-hour of each rate schedule to reflect and recover all purchased power and transmission costs billed to the Village from all service providers.

CALCULATION OF THE PURCHASED POWER ADJUSTMENT CHARGE

The PPAC shall equal the total cost of all power and transmission costs billed to the Village in each month divided by the total kWh purchases in that month, less the base cost of purchased power measured at system input level adjusted by a loss factor (Factor of Adjustment). The resultant cost per kWh shall be rounded to the nearest \$0.000001 and applied as a charge or credit to all kilowatt-hours billed in the following month.

ANNUAL RECONCILIATION

At the end of each fiscal year the Village will perform a reconciliation to determine whether there was an under- or over-collection of purchased power expense during the preceding year. The calculation is as follows:

Total Purchased Power Cost – (kWh sold x Base Cost of Purchased Power x Factor of Adjustment)

The result will then be compared to the actual PPAC revenues recovered during this period to determine if a PPA Reconciliation Surcharge or Refund is applicable. The resultant Surcharge or Refund will be included as a line item in the following month(s) calculation(s) of PPAC in order to adjust revenues to more accurately reflect actual expenses. The number of months over which the Surcharge or Refund will be included will depend on the size of the Surcharge or Refund. If the Surcharge/Refund is under \$5,000 it will be included in one month. Surcharges/Refunds between \$5,000 and \$10,000 will be split between two months and any Surcharges/Refunds over \$10,000 will be charged/credited in \$5,000/month increments until complete in order to minimize the impact on rate payers.

BASE COST OF POWER

The base cost of power for computation of the PPAC shall be \$0.016926/kilowatt-hour as measured at the system input level. The base cost of power measured at the sales level shall be \$0.017962/kilowatt-hour.
