SERVICE CLASSIFICATION NO. 4 (Cont'd)

RESIDENTIAL OFF-PEAK CHARGING SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

4.6 (Cont'd)

Metering configuration will be determined by the Company. In the event that:

- (i) the Company determines that a second meter is a necessary part of an interconnection, the costs of such meter installation will be considered to be interconnection costs pursuant to Addendum New York State Standardized Interconnection Requirements, but shall not be deemed necessary for safety and adequacy of service; or,
- (ii) the customer elects a second meter installation, the meter shall be treated as a component of the customer's generation system and the customer shall bear the cost of such meter installation.

Customers with micro-combined heat and power or fuel cell generating equipment who satisfy all installation and operation requirements will be allowed to combine their purchases from and sales to the Company in a billing period. In the event that:

- (i) the amount purchased from the Company exceeds the amount sold to the Company (net purchases), the customer will be billed for the difference at applicable rates specified in this Service Classification.
- (ii) the amount sold to the Company exceeds the amount purchased from the Company (net sales), the excess on-site production shall be converted to the equivalent value at the applicable rate under Service Classification No. 10 and applied as a direct credit to the customer's current total utility bill. To the extent that the value of this production credit exceeds all components of the customer's total bill, the remaining credit shall be carried forward to the succeeding billing period.
