

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 10/19/2015
Issued in compliance with order in Case 15-E-0082 dated 7/17/2015

Leaf: 246
Revision: 3
Superseding Revision: 2

GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER R – Net Metering for Customer-Generators – Continued

B. Definitions, applicable to this Rider only

“Avoided Energy Cost” refers to a calculation, determined for the NYISO load zone applicable to the Customer, equal to the Company’s total energy cost with respect to the day-ahead and real-time NYISO energy markets for the specified period divided by the Company’s total kWhr purchases from the NYISO for that period, based on the best available information at the time of the Company’s calculation. This amount will be increased by a factor of adjustment of 1.066 for Customers taking service at the secondary distribution level.

“Community Distributed Generation” or “CDG” refers to net energy metering in which excess energy produced by a Customer’s generating equipment is applied to other Customers’ electric accounts pursuant to Section F of this Rider.

“Farm Operation” means “farm operation” as defined in Subdivision 11 of Section 301 of the New York State Agriculture and Markets Law (“Agriculture Law”), unless the Customer uses wind electric generating equipment. “Farm Operation” means “land used in agricultural production” as defined in Subdivision 4 of Section 301 of the Agriculture Law if wind electric generating equipment is used.

“Net energy metering” measures the reverse flow of electricity so as to register the difference between the electricity supplied by the Company and the electricity provided to the Company by the Customer’s generating equipment.

“Net energy” is the difference between the amount of energy supplied by the Company and the amount of energy provided to the Company by the generating equipment during a billing period.

“Remote Net Metering” or “RNM” refers to net energy metering in which excess energy produced by a Customer’s electric generating equipment is applied to that Customer’s other electric accounts pursuant to Section F of this Rider.

“Residential,” for purposes of this Rider, refers to service under SC 1, and “Non-residential” refers to service under any other Service Classification.

C. Applications for Service

1. Customers’ applications for interconnection to the Company’s system will be made using the applications set forth in Addendum-SIR.
2. Assuming the conditions of the Standardized Interconnection Requirements are met, the Company and the Customer will execute the New York State Standardized Contract set forth in Addendum-SIR.
3. Customers’ applications for service under this Rider will be made using Application Form G in the General Rules, except for applications for CDG, which will be made using the application form set forth in the Company’s CDG Operating Procedure.
