Re: Statement of Clean Energy Standard Supply Surcharge to P.S.C. No. 10

Dear Secretary Phillips:

Consolidated Edison Company of New York, Inc. (the “Company”) is filing with the New York State Public Service Commission (the “Commission”) a revised “Statement of Clean Energy Standard Supply” (“CESS”) to the Company’s Schedule for Electricity Service, P.S.C. No. 10 – Electricity (the “Tariff”), applicable to its customers in the City of New York and the County of Westchester.

The statement submitted herewith is as follows:

CESS Statement No. 9 to P.S.C. No. 10 – Electricity

The statement is issued to become effective April 1, 2024.

**Reason for Filing**

Pursuant to General Rule 25.4 of the Tariff, the Company will file subsequent statements on an annual basis to become effective April 1, not less than three days before the effective date.

The Company’s mechanism for the recovery of the CESS costs, if any, consists of four components: (1) Renewable Energy Credits (“RECs”), including Alternative Compliance Payments (“ACPs”); (2) Zero Emission Credits (“ZECs”); (3) Offshore Wind Renewable Energy Credits (“ORECs”); and (4) the Environmental Component – Market Value credits paid to customers under the Value Stack Tariff. These costs are collected from all Full-Service Customers on a cents per kWh basis.

The actual REC under-collection for the period April 1, 2022 through March 31, 2023, inclusive, was \$4,473,274. The REC cost for the period April 1, 2023 through March 31, 2024, is \$49,867,528. The estimated under-collection for this period is \$5,843,742 and the total reconciliation for the period April 1, 2022 through March 31, 2024, is an under-collection of \$7,713,665.

The actual ZEC under-collection for the period April 1, 2022 through March 31, 2023, is \$4,016,451. The ZEC cost for the period April 1, 2023 through March 31, 2024, is \$85,828,156. The estimated over-collection for this period is \$499,811 and the total reconciliation for the period April 1, 2022 through March 31, 2024, inclusive, is an over collection of \$489,108.

The Environmental Component Credits - Market Value of the Rider R Value Stack for the period December 2022 through November 2023, equals \$2,979,002.64. This cost will be charged to customers for the period April 1, 2024 through March 31, 2025, via the Environmental Component Credit – Market Value of the Rider R Value Stack as shown on the Statement of the Clean Energy Standard Supply Surcharge.

Accordingly, the Company has determined that the REC surcharge shall be set at 0.3418 cents per kWh, the ZEC surcharge shall be set at 0.3635 cents per kWh and the Environmental component Credit – Market Value of the Rider R Value Stack surcharge shall be set at 0.0134 cents per kWh. The surcharges are reflected in the attached statement.

Questions regarding the filing can be directed to Ricky Joe at (212) 460-4995.

Respectfully submitted,

/s/ William A. Atzl, Jr.
