SERVICE CLASSIFICATION NO. 1

APPLICABLE TO USE OF SERVICE FOR

Single-phase residential purpose usage in an individual residence; in an individual flat or individual apartment in a multiple family dwelling; for residential purposes in a rooming house not more than four (4) rooms are available for rent; and for single phase farm service when supplied through the farm residence meter; use exclusively in connection with religious purposes by corporations or associations organized and conducted in good faith for religious purposes, and including the operation by such corporation or association of a school, notwithstanding that secular subjects are taught at such school; for single-phase service exclusively in connection with a community residence as defined in subdivision 28, 28A or 28B of Section 1.03 of the Mental Hygiene Law, provided that such residence is operated by a not-for-profit corporation and if supervisory staff is on site on a twenty-four hour per day basis that the residence provides living accommodations for fourteen or fewer residents; and use for any post or hall owned or leased by a not-for-profit organization that is a veterans organization.

CHARACTER OF SERVICE

Continuous-alternating current, single phase, 60 cycle, 120 volt 2 wire, or 120/240 volt 3 wire, or 120/208 volt 3 wire.

RATE

December – March	Customer Charge	\$ 2.90
	First 750 kWh, per kWh	\$ 0.0325
	Over 750 kWh, per kWh	\$ 0.0617
	Water Heater Credit (if applicable)	\$ 9.50
April – November	Customer Charge	\$ 2.90
	All kWh, per kWh	\$ 0.0325

GROSS RECEIPTS TAX

The rates and charges of customers residing in the Village of Ilion will be subject to a tax of 1% according to Section 5-530 of the Village Tax Law.

MINIMUM CHARGE

Per meter, per month	\$ 2.90
----------------------	---------

TERMS OF PAYMENT

All bills are due when personally served or 3 days after the mailing of the bill and may be paid in full on or before the “DUE DATE” specified on the bill, which shall be at least 20 days after the date on which the bill is rendered. A monthly late payment charge will be assessed at a rate of one and one-half (1½%) on a customer’s unpaid balance as provided for in Rule VIII of the NYMPA generic tariff. Remittance mailed on the “DUE DATE” will be accepted without the late charge, the postmark to be conclusive evidence of the date of mailing. The failure on the part of the Customer to receive the bill shall not entitle him or her to pay without the late payment charge after the “DUE DATE”.

SERVICE CLASSIFICATION NO. 1 (CONT'D)

PURCHASED POWER ADJUSTMENT

The charges set forth in this service classification shall be subject to a purchased power adjustment as provided for in Rule IX of the NYMPA generic tariff. The charges billed under this section shall be subject to the late payment charge.

BASE PURCHASED POWER PER KILOWATT-HOUR

The base purchase power cost per kilowatt-hour pursuant to Rule IX.B of the NYMPA generic tariff is \$0.012844.

FACTOR OF ADJUSTMENT

The factor of adjustment pursuant to Rule IX.D of the NYMPA generic tariff is 1.087593.

TERM

The Customer will be responsible for any use of service until 2 days after written notice to discontinue service has been received by the Utility.

SPECIAL PROVISIONS

- A. Application for service may be oral, except as herein otherwise provided.
- B. Whenever service is supplied from a line extension constructed in accordance with the provisions of Rule V of the NYMPA generic tariff, and whenever such service is subject to a surcharge or minimum charge determined pursuant to these rules, Customer shall:
 1. Make written application for service upon the Utility's prescribed forms.
 2. Comply with all of the applicable provisions of the rules including the guarantee to pay the surcharge or minimum charge.
 3. Upon terminating service, pay the balance due on the surcharge or minimum charge.
- C. Customer shall provide any facilities necessary to secure his or her own equipment against disturbances including, but not limited to, loss of phase, transients, voltage pulses or harmonic frequencies whether originating with his or her own equipment or elsewhere. These facilities shall be installed on the load side of Customer's service equipment.
- D. If the Customer proposes to install computers, solid-state devices, or other voltage sensitive equipment, the Customer may have to safeguard this equipment by the application of line filters, solid-state line-voltage regulators, transient suppressors, isolating transformers, uninterruptible power supply (UPS) systems or motor generators. Utility distribution systems normally operate between certain voltage limits as established by National Standards. The Utility should be contacted for further guidance.

SERVICE CLASSIFICATION NO. 1 (CONT'D)

SPECIAL PROVISIONS (CONT'D):

E. The Utility will furnish the meter base, size not to exceed 200 amperes, for single and duplex residences. The Customer shall be responsible for the installation of same at a Utility specified location. Residential installations for single and duplex residences requiring larger than a 200-ampere meter base per location shall bear a charge for the differential in cost between the standard 200-ampere meter base and the larger size requested by the Customer and shall be supplied by the Utility for the Customer's installation of same. All meters shall be furnished and installed by the Utility.

F. The Utility will furnish single-phase meter bases, at the Utility's expense, up to a six (6) position meter location and the Customer shall be responsible for the installation of same. All meters shall be furnished and installed by the Utility.

G. For apartmental installations in excess of six (6) single-phase meter positions or one (1) three-phase meter position (network metering), the Customer shall furnish and install a modular meter cabinet installation of the required number of meter positions, internally pre-wired with busbars of the required capacity and supplied with a lockable disconnect means for each meter position. The character of service (voltages) for service to apartmental units shall be 120/240 volt single phase or 120/208 volt three phase, four wire, Wye at the Utility's option based on availability, loadings, etc. All meters shall be furnished and installed by the Utility. For installations in excess of six (6) metered positions, the Customer shall install the meter module within the structure and shall be accessible to Utility personnel on a round-the-clock basis. Location of meter modules will not be accepted if location is to be utilized for any form of storage facility. Total access to the meter module must be guaranteed by the Customer.

H. The Customer shall apply for and receive permission from the Utility prior to effecting any changed and/or modification of the Customer's wiring or service. Failure to comply with this regulation shall cause the Utility to refuse its service to, or remove its service from, any installation which in the judgment of the Utility will injuriously affect the operation of its system or its service to others.

SERVICE CLASSIFICATION NO. 2 (CONT'D)

SPECIAL PROVISIONS (CONT'D)

F. Primary and Secondary Voltage Service

1. Where an overhead primary voltage service (2,400; 4,160 volts) is supplied, the Customer, from the metered point of service entrance, at his or her own expense and in a manner satisfactory to the Utility, shall furnish, install and maintain such switches, transformers, regulators, capacitors and other equipment as the Utility may deem necessary to assure stability and compatibility with the system service.

2. Where an underground primary voltage service is supplied, the Customer shall furnish, install and maintain all electrical equipment such as all wire switches, transformer, regulators, capacitors and other required equipment as the Utility may deem necessary to assure stability and compatibility with the system service to the point of connection on the Utility's electric system.

3. Where an overhead secondary voltage service greater than 400 amps to non-residential Customers is supplied, the Customer, from the metered point of service entrance, at his or her own expense and in a manner satisfactory to the Utility, shall furnish, install and maintain such switches, transformers, regulators, capacitors and other equipment as the Utility may deem necessary to assure stability and compatibility with the system service.

4. Where an underground secondary voltage service greater than 400 amps to non-residential Customers is supplied, the Customer shall furnish, install and maintain all electrical equipment such as all wire switches, transformers, regulators, capacitors and other required equipment as the Utility may deem necessary to assure stability and compatibility with the system service to the point of connection on the Utility's electric system.

G. The Customer, in taking three phase electric service, shall connect his or her lighting and other single phase loads so as to maintain as nearly as is reasonably possible equal currents in each of three phase conductors at the point of delivery. The current in any phase conductor shall not exceed the average of the currents in all three phase conductors by more than five percent (5%).

SERVICE CLASSIFICATION NO. 7 (CONT'D)

SPECIAL PROVISIONS

- A. Application for service may be oral, except as herein otherwise provided.
- B. Whenever service is supplied from a line extension constructed in accordance with the provisions of Rule V of the NYMPA generic tariff, and whenever such service is subject to a surcharge or minimum charge determined pursuant to these rules, Customer shall:
1. Make written application for service upon the Utility's prescribed forms.
 2. Comply with all of the applicable provisions of the rules including the guarantee to pay the surcharge or minimum charge.
 3. Upon terminating service, pay the balance due on the surcharge or minimum charge.
- C. With respect to high pressure sodium and mercury units, the following shall apply:
1. The Utility shall furnish, install, own, operate and maintain an enclosed, photo-electrically controlled high pressure sodium and/or mercury luminaire complete with not less than a 30" bracket, ballast and a multiple lamp at the wattage designated under the rate charge desired. The Utility shall also provide a cable service span of 100 feet which will be connected on the line side of the Customer's meter. Where the service span exceeds 100 feet, the Customer shall pay for the additional cable used.
 2. The lighting unit will be installed only on private property owned or leased by the Customer. The Customer shall furnish and install the necessary pole or other support, except as hereinafter provided. The Utility reserves the right to require a mounting height which will provide proper light distribution from the unit. Where a Utility pole is appropriately located on the premises owned or leased by the Customer, the Utility may waive the requirement that the support be furnished by the Customer, and install the unit on its pole.
 3. Upon written request by the Customer, the Utility will change the location of the lighting unit, providing a proper support is furnished and installed. The Customer must agree in writing to pay the Utility for the cost incurred in making such change.
- D. The Utility will not furnish, install or maintain incandescent units.
- E. Lighting service will be provided every night and all night during the hours between 30 minutes after sunset and 30 minutes before sunrise, aggregating about 4,200 hours per year, unless prevented by accidents or other causes beyond the control of the Utility.
- F. The Customer shall notify the Utility whenever the lamp shall become extinguished or out of service for any reason and the Utility shall replace the lamp and/or make the necessary repairs with reasonable promptness.

SERVICE CLASSIFICATION NO. 8
Individual Service Agreements – Economic Development

APPLICABLE TO THE USE OF SERVICE FOR

Electric service under this service classification is for large commercial and industrial customers who meet all of the criteria contained herein. This service classification is designed to attract industrial and large commercial relocation or expansion or to retain existing industry by offering power to such large commercial and industrial customers not eligible for service under any other Utility service classifications.

ELIGIBILITY

A new or existing customer who meets all eligibility requirements stated below shall be eligible to take service in accordance with the rates, charges and provisions set forth under this service classification.

Businesses eligible for service under this service classification include (a) industrial, (b) manufacturing, (c) research and development facilities, (d) non-retail service firms, (e) warehousing and distribution facilities, (f) agricultural businesses, (g) not-for-profit business, (h) headquarters facilities, including those of retail businesses, (i) tourism businesses and other businesses whose purpose is to develop recreational, cultural or historical facilities likely to attract significant numbers of visitors, including “destination retail projects.”

Businesses not eligible for service under this service classification include (a) educational, religious and governmental facilities, (b) lodging facilities, except as part of tourism “destination retail projects,” (c) legal, medical or nursing facilities, (d) retail businesses, (e) residential establishments, (f) casinos and other gaming establishments.

Customers for this service classification are eligible businesses who create new jobs and add a minimum of 100kW (peak demand) of electric load by (a) constructing a new facility, (b) expanding an existing facility, (c) adding facilities or equipment to an existing site; or (d) adding facilities through the redevelopment of a vacant or inactive site, including land or buildings which have been previously developed. Customers must meet and continue to satisfy the requirements of the New York Power Authority (NYPA) Municipal and Rural Cooperative Economic Development Program (EDP), as may be amended from time to time, or such other economic development power supply program as may exist from time to time.

Existing customers may also be eligible for service under this service classification for job retention if they meet the specific NYPA EDP criteria and guidelines. Customers must supply documentation to the Utility’s satisfaction of a viable alternative, competitive energy supplier outside of the Utility’s service territory or show that its product offerings would be less competitive within its relevant geographic market (local, national or international) but for the existence of the rates offered under this service classification.

Customers must complete all necessary applications for power.

Prior to commencement of service hereunder, the Utility must receive an allocation of additional hydropower from NYPA.

SERVICE CLASSIFICATION NO. 8 (CONT'D)

INDIVIDUAL SERVICE AGREEMENT (ISA)

Prior to commencement of service hereunder, Customer and Utility shall execute an agreement governing the terms and conditions necessary for the Utility to provide service to Customer under this service classification including, but not limited to, the term of service, the character of service, and the rates and charges to be paid for the service rendered. The minimum term of any initial offering under an ISA shall be twelve (12) months.

FILING REQUIREMENTS

Within 30 days of executing an ISA, the Utility will file with the New York State Public Service Commission information summarizing the ISA. Quarterly, the Utility will file reports with the New York State Public Service Commission detailing the number of ISAs and the associated capacity and revenues.

OTHER TERMS AND CONDITIONS

- A. Service will be provided under this service classification in accordance with the ISA and all other terms and conditions of the Utility's Tariff and the NYMPA generic tariff.
- B. Customer shall make application for service upon the Utility's prescribed forms.
- C. The Utility and Customer mutually shall agree on the allocation of any costs associated with the installation of additional facilities required to serve the Customer. The allocation of these costs shall be specified in the ISA.

CHARGES

A. RECONNECTION CHARGE

When service has been discontinued and the same Customer applies for reconnection of service at the same location within four (4) months, a reconnection charge will be made in the amounts as follows:

\$26.50 between 8:00 a.m. and 3:30 p.m. on working days, Monday through Friday

\$53.00 after 3:30 p.m. on working days, Monday through Friday, and all day Saturday

\$79.50 all day Sunday and Holidays

The reconnection charge shall be payable before service will be established.

B. INSUFFICIENT CHECK CHARGE

Any checks received in payment for electric service which are returned to the Utility for insufficient funds or are otherwise dishonored by the bank shall bear a nonrecurring charge for each check that has to be processed by the Utility. If two checks have been returned by the bank, the Customer who issued the dishonored checks may be required by the Utility to render future payments by cash, money order, certified or cashier's check. Post-dated checks shall be returned to the Customer as invalid for the transaction. Only United States currency shall be accepted for payment of accounts due the Utility.
