

P.S.C. NO. 3 ELECTRICITY
ORANGE AND ROCKLAND UTILITIES, INC.
INITIAL EFFECTIVE DATE: April 1, 2012

LEAF: 370
REVISION: 0
SUPERSEDING REVISION:

SERVICE CLASSIFICATION NO. 25

APPLICABLE TO USE OF SERVICE FOR:

Sales and delivery of electric power supply provided by the Company, or delivery of electric power supply provided by an Energy Service Company under the Company's Retail Access Program, for standby purposes subject to the Special Provisions of this Service Classification. More specifically, this service is available:

- (1) to replace and/or to supplement the power and energy ordinarily generated by a customer by means of a private generating facility on their premises; or
- (2) for station use by a customer that is a wholesale generator. "Station Use" includes power and energy used by the customer at its premises in connection with its generating facility (a) during periods when such needs are not served by the generator and (b) to restart the generator after an outage. This service also applies to wholesale generators that require service when their own generating equipment is not sufficient to meet the station loads, provided that the service is not served under a separately-metered account.

Subject to the provisions dealing with interconnected operations set forth in this Service Classification and the regulations governing interconnected operations that are incorporated into this Service Classification by reference, the customer's generator may be connected for:

- (1) parallel operation with the Company's service; or
- (2) isolated operation with standby service provided by the Company by means of a double-throw switch.
