

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 03/19/2012
Issued in compliance with order dated 03/15/2012 in Case 09-E-0115

Leaf: 261
Revision: 1
Superseding Revision: 0

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER S – COMMERCIAL SYSTEM RELIEF PROGRAM - Continued

E. Metering – Continued

4. The Company will install interval metering (i) within three weeks of an applicant's request and payment for an upgrade to interval metering that has landline telecommunications capability, and (ii) within three weeks of the later of the Company's receipt of payment for an upgrade to interval metering with wireless communications capability and receipt from the participant of the active Internet Protocol ("IP") address that the wireless carrier has assigned to the modem's ESN. If the Company misses the installation time frame, it will make a "Lost Reservation Payment," unless the meter delay was caused by a reason outside the Company's control, such as the telephone company's failure to install a landline or, if, at the Company's request, the Commission grants the Company an exception due to a condition such as a major outage or storm. A Lost Reservation Payment will be calculated by determining the number of months between the earliest month in which the customer could have begun participation had the meter been installed within the required timeframe (assuming the Company's acceptance of a completed application and receipt of payment for the meter upgrade) and the first month following the completed installation, and multiplying that number by the pledged kW and associated per-kW Reservation Payment Rate.

F. Data Review

The Company reserves the right to review records and/or operations of any Customer, Aggregator, or customer of an Aggregator to verify enrollment information and performance associated with a designated Load Relief Period or Test Event called by the Company. Once the Company initiates a data review, all payments will be suspended pending the outcome of the review. The Company will complete its review within 30 days of receipt of all requested data. Any suspended payments will be reinstated if the Company's review of the data results in a finding that the enrollment and performance information are correct.

If the Company determines that a Customer, Aggregator, or customer of an Aggregator failed to cooperate fully and promptly with the review and/or did not fully comply with the provisions of this Rider and/or provided inaccurate data, the Customer or the customer of the Aggregator will be deemed ineligible to participate in the program until the issue is rectified. In addition, the Customer or Aggregator will be required to make prompt repayment to the Company of any payments that were made to such Customer or Aggregator, on behalf of its customer, for the Summer.

G. Measurement

A single CBL Verification Methodology is used to measure both kW and kWh performance on each account. The weather-adjusted CBL methodology is used to measure performance unless the Customer or Aggregator elected the average-day CBL methodology either at the time that application for service was made under this Rider or by May 1 of the current Summer Period, if later.

Demand reductions of an Aggregator will be measured on a portfolio basis by Network by CBL Verification Methodology.
