

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 03/19/2012
Issued in compliance with order dated 03/15/2012 in Case 09-E-0115

Leaf: 281
Revision: 1
Superseding Revision: 0

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER U – DISTRIBUTION LOAD RELIEF PROGRAM - Continued

E. Metering - Continued

3. For participation under the Voluntary Load Relief Program, the metering equipment and telecommunications service must be installed and made operational prior to the Company's acceptance of a completed application. For participation under the Summer Reservation Payments Program, the metering equipment and telecommunications service may be installed and made operational following the Company's acceptance of a completed application. For the Summer Reservation Payments Program, the application may be submitted prior to or in parallel with the meter and telecommunications installation process, but will not be accepted until the meter is installed and the communications service is operational. Participation under the Summer Reservation Payments Program will commence the first day of the first month within the Summer Capability Period that occurs at least 30 days after both the interval metering and telecommunications service become operational, but no later than July 1 of the current Summer Capability Period.
4. The Company will provide the status of the meter installation to applicants for the Summer Reservation Payments Program: (i) within three weeks of the date that payment is received if the meter has landline telecommunications capability and (ii) within three weeks of the later of the Company's receipt of payment for an upgrade to interval metering with wireless communications capability and receipt from the participant of the active Internet Protocol ("IP") address that the wireless carrier has assigned to the modem's ESN. The Company will install the requested metering within that time frame, provided that the application for participation in the program is otherwise approved. If the Company misses the installation time frame, it will make a "lost" Reservation Payment equal to the pledged kW and associated Summer Reservation Payment per month starting with the first month in which the first day is later than three weeks after the Company received payment and ending with the month in which the installation is completed; provided, however, that the Company will not be required to make a lost Reservations Payment if it missed the installation time frame due to reasons outside of its control, such as a landline not installed by the telephone company, or if, at the Company's request, the Commission grants the Company an exemption due to a major outage or storm.
