7. Street Light Circuit Charge

The annual street light circuit charges per unit are presented below in Table 9. Street light circuit charges are compliant with the standard types of service. The Company will provide the engineering, design, configuration and alignment of the street light circuit facilities.

Typically the OH street light service utilizes the distribution system secondary supply conductors as the electrical source.

In both the UG and URD services, the street light cable (wires) are independent of the underground distribution cables.
