SUPERSEDING REVISION:

38. NET METERING FOR CUSTOMER GENERATORS (Cont'd)

C. Farm Waste Electric Generation (Cont'd)

Metering: (Cont'd)

2. Service Classification No. 6:

Customers may choose from the following metering options:

- (a) Using a single non-time differentiated watthour meter with bi-directional capability to measure the flow of energy in both directions, in which case the customer will be required to take service under Service Classification No. 1 of this Schedule; or
- (b) Using two meters to separately measure the flow of energy in each direction, with the customer's net output measured by a non-time differentiated watthour meter, in which case the customer will be required to take service under Service Classification No. 1 of this Schedule; or
- (c) Using two meters to separately measure the flow of energy in each direction, with the customer's net output measured by a time-differentiated watthour meter purchased by the customer; or
- (d) Using a single time-differentiated watthour meter with bi-directional capability to measure the flow of energy in both directions.

Customers electing either option (b) or option (c) shall be responsible for the costs of any new meter box and socket, to the extent required.

An existing customer with metering configuration (a), (b) or (c) installed prior to December 23, 2004 may replace this metering configuration with option (d) and shall be responsible for the net incremental costs incurred in installing the new metering configuration.
