

PSC NO: 10 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 11/01/2011

Leaf: 472  
Revision: 0  
Superseding Revision:

**SERVICE CLASSIFICATION NO. 11**  
**BUY-BACK SERVICE**

**Common Provisions - Continued**

**Determination of Demand**

The contract demands for high-tension service and low-tension service for the purpose of this Service Classification shall be the contract demands as specified in the Customer's request for service hereunder (expressed in kW), unless and until a higher maximum demand is created by the Customer, in which case such higher maximum demand shall become the contract demand for that month and thereafter unless and until exceeded by a still higher maximum demand, which in turn shall likewise be subject to the foregoing conditions, provided, however, that if a Customer requests and receives a reduction in the contract demand (as explained in General Rule 10.10), the demand history prior to the reduction will not be considered in determining the contract demand for subsequent months.

If the monthly maximum demand exceeds the contract demand by ten percent or less, a surcharge equal to twelve times the monthly contract demand rate for the excess in demand will apply to the monthly bill. If the monthly maximum demand exceeds the contract demand by more than ten percent, a surcharge equal to twenty-four times the monthly contract demand rate for the excess in demand will apply to the monthly bill. The excess in demand to which the surcharge applies will be billed at the rate block(s) at which the increase in the contract demand for that month is billed.

Buy-back and Standby Service, as the latter is defined under General Rule 20, must each be contracted for separately and will be metered separately. If service is taken under this SC and another SC through the same service connection, the contract demand charges under this SC shall apply only to the contract demand in excess of the contract demand billed under Standby Service rates or the contract demand in excess of the as-used demand billed under another rate.

For Customers who elect to engage in the simultaneous purchase and sale of energy pursuant to Special Provision (B) hereof, the number of kilowatts of demand for billing purposes under this Service Classification will be reduced by the number of kilowatts of demand billed at the firm service rates if the two types of services are taken through the same service connection.

The Company will install a demand measuring device of a type approved by the Public Service Commission for the determination of maximum demand. See General Rule 10.4 for the definition of maximum demand.
