PSC NO: 10 – Electricity   Leaf: 274
Consolidated Edison Company of New York, Inc.   Revision: 0
Initial Effective Date: 11/01/2011   Superseding Revision:

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER T – CRITICAL PEAK REBATE PROGRAM - Continued

E. Metering

1. If the average of the Customer's maximum monthly demands over the 12 months prior to enrollment was 250 kW or greater, the Customer must have interval metering with telecommunications capability used by the Company for monthly billing in order to participate under this Rider. If, at the time of application for service under this Rider, the Company does not bill such Customer monthly using interval metering, the Customer or Aggregator shall arrange for the furnishing and installation of interval metering with telecommunications capability to be used for billing, and arrange for telecommunications service, at its expense, net of any discount or rebate received by the Customer. If metering that communicates wirelessly is requested, the Company will charge $200.00 to visit the premises to determine whether or not this is viable.

2. An application will not be accepted for participation under this Rider unless both the metering and telecommunications service are already operational.

3. Smaller users require Company-approved equipment that measures, records and communicates interval data to the Company. The Company will provide the necessary equipment subject to the following terms: (a) the equipment will remain the property of the Company; (b) the Company may require that the Customer or Aggregator return the equipment if the participant fails to consistently provide the minimum reductions specified in section F; and (c) the Company may charge the Customer or Aggregator for the cost of the equipment if it is not returned as requested.
