SERVICE CLASSIFICATION No. 6C - Continued

Customers with Semi-Automatic Equipment

When the Central Park Temperature reaches the Designated Interruption Temperature for customers with semi-automatic equipment, the Company will remotely activate an alarm at the Customer's site notifying the Customer to manually switchover to an alternate fuel. If the alarm was activated remotely, the Customer may manually switch back to natural gas once the Central Park Temperature reaches the Designated Resumption Temperature for customers with semi-automatic equipment. If the Local Outside Temperature reached the Designated Interruption Temperature and the Designated Interruption Temperature had not been reached at Central Park, the Customer may manually switch back to natural gas once the Local Outside Temperature reaches the Designated Resumption Temperature.

Annual System-Wide Test:

In addition to any remote switchovers caused by temperatures, the Company will conduct an annual system-wide test of Customers served under this Service Classification.

Customer Failure:

Each time a Customer fails to interrupt gas service when there is a Company initiated interruption, except for the permitted two therms per hour, will be considered a violation of the requirements of this Service Classification. The Customer will be notified of each violation. For any two violations, (consecutive or non-consecutive), including the annual system-wide test the Customer will be notified that it has violated the requirements of the tariff and the following will apply:

For sales Customers, effective with the next billing period following the second notice of violation, and for transportation Customers, effective as soon as practicable, such Customers will be transferred to the equivalent firm service classification unless (i) the Company has been notified in writing that the Customer has chosen to terminate gas service or (ii) the Customer has been notified that the Company has determined in its sole discretion that it can not provide firm service to the Customer, and service will be terminated in thirty (30) days. Such Customers transferred to firm service are required to remain on firm service for the remainder of that winter season and through the end of the next winter season. Such Customers who have either elected to terminate service pursuant to (i), above or whose service has been terminated pursuant to (ii) above, may not return to service under this Rate Schedule for the remainder of that winter season and through the end of the next winter season. After that time, a Customer becomes eligible to re-apply for any non-firm service.

Issued by: Alan P. Foster, Senior Vice President and Controller, Brooklyn, NY
