

PSC NO: 1 GAS LEAF: 154.3
COMPANY: KEYSpan GAS EAST CORP. DBA BROOKLYN UNION OF L.I. REVISION: 2
INITIAL EFFECTIVE DATE: 11/10/10 SUPERSEDING REVISION: 1
STAMPS: Issued in compliance with Order in Case 06-G-1186 dated 06/23/09

SERVICE CLASSIFICATION No. 7
Interruptible Transportation Service (Continued)
(Rate Codes: 710, 710A, 711, 720, 721)

Special Provisions (continued):

10. Customer will have responsible personnel available to receive and act upon notices from the Company 24 hours a day, 7 days a week, including holidays.

Remote Switchover of Dual Fuel Equipment:

Customers with Automatic Equipment

When the Central Park Temperature reaches the Designated Interruption Temperature for customers with automatic equipment, the Company will remotely switch over the Customer's equipment to an alternate fuel. The Company will endeavor to provide Customers with advance notice of a remote switchover. If there was a remote switch over (even if the Customer had already been switched over because the Local Outside Temperature had already reached the Designated Interruption Temperature), there will be a remote switch over of the Customer's equipment back to natural gas once the Central Park Temperature reaches the Designated Resumption Temperature. If there was no remote switch over, and the Customer's equipment switched over because the Local Outside Temperature reached the Designated Interruption Temperature, the Customer's equipment will be switched back to natural gas once the Local Outside Temperature reaches the Designated Resumption Temperature. .

Customers with Semi-Automatic Equipment

When the Central Park Temperature reaches the Designated Interruption Temperature for customers with semi-automatic equipment, the Company will remotely activate an alarm at the Customer's site notifying the Customer to manually switchover to an alternate fuel. If the alarm was activated remotely, the Customer may manually switch back to natural gas once the Central Park Temperature reaches the Designated Resumption Temperature for customers with semi-automatic equipment. If the Local Outside Temperature reached the Designated Interruption Temperature and the Designated Interruption Temperature had not been reached at Central Park, the Customer may manually switch back to natural gas once the Local Outside Temperature reaches the Designated Resumption Temperature.
