

PSC NO: 12 GAS  
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION  
INITIAL EFFECTIVE DATE: 08/01/12  
Issued in compliance with Order in Case 11-G-0543 dated May 23, 2012

LEAF: 170  
REVISION: 3  
SUPERSEDING REVISION: 2

**SERVICE CLASSIFICATION NO. 9**

**INTERRUPTIBLE TRANSPORTATION/STANDBY SALES SERVICE**

**APPLICABLE TO USE OF SERVICE FOR**

Transportation of customer-owned gas and Standby Sales Service from Company-owned gas to those individual customers that have the capability of transporting and consuming at one service point 35,000 Ccf or greater per year or to those aggregated customer buying groups having the capability of transporting and consuming 50,000 Ccf or greater per year where:

1. the customer agrees to take service on a fully interruptible basis;
2. the customer provides and maintains necessary standby facilities together with a sufficient supply of fuel to operate continuously during periods when gas supply is interrupted;
3. human needs customers and customers relying on distillate fuel as their alternate fuel must maintain standby facilities and a fuel reserve that will support ten (10) days of the customer's energy requirements and have arranged for fuel deliveries during curtailments that are longer than ten (10) days. The customer's alternate fuel reserve inventory must be in place on or before November 1. Customers with storage facilities that cannot maintain the required fuel reserves must provide documentation confirming that they have arranged to have fuel deliveries during curtailment periods. Alternatively, customers excluding schools and human needs customers, may elect to attest to their intent to curtail their operation during periods of interruption rather than be subject to these alternate fuel requirements by providing an affidavit in writing at least thirty (30) days prior to November 1 of each year. Curtailment of a customer's operation shall be defined to mean that zero gas consumption is recorded on the customer's meter for the applicable interruption period. The customer must accomplish this zero gas consumption for the duration of the interruption period by curtailing the operation of its facility rather than switching to its alternative fuel source. Customers failing to comply completely with an interruption request will be subject to the charges described in Special Provision 9.9 of this service classification as well as the Company's actual cost to manually shut off gas to the customer in the event the customer does not cease operations;
4. the service hereunder is not used in any equipment which is supplied with gas service under any other Service Classification except for S.C. No. 8;
5. the customer's premises are (a) located adjacent to the Company's existing gas mains having adequate capacity to supply customer's prospective requirements in addition to the simultaneous requirements of present or prospective customers taking firm or interruptible service from such mains, or (b) at other points under arrangements made in accordance with General Information, Section 25;
6. service is to be provided to individual customers and aggregated customer buying groups under an agreement as included in General Information, Sections 35 or 36;
7. the customer agrees to discontinue or curtail the use of gas service, at any time, at the Company's option on not less than two hours' notice to the customer; and
8. the customer agrees to notify the Company, within 24 hours, in the event the customer discontinues service provided under this Service Classification.
