STAMPS: Issued in compliance with Order in Case 11-G-0543 dated 05/23/12

SERVICE CLASSIFICATION No. 7
Interruptible Transportation Service (Continued)
(Rate Codes: 710, 711, 720, 721)

B. Character of Service:

Transportation service under this Service Classification shall be subject to reduction or interruption, and is conditioned upon the availability of capacity on Company facilities.

In the event that the Company calls on peaking assets to supplement supply to meet high demand or for isolated distribution system reliability reasons in excess of four hours (other than for LNG plant idling or cooling or for system testing), or if the Company, at its sole discretion, determines that it is warranted to protect the reliability and safety of the system for firm Customers, the Company will interrupt service to Customers on this service classification. The Company will endeavor to provide notification (within two hours) of a scheduled interruption in accordance with the Communications Protocol described in this service classification. Upon receipt of such notice, the Customer shall curtail or discontinue use of gas as instructed by the Company.

In providing service under this Service Classification, the Company will transport and control the dispatch of the Customer-owned natural gas from the City Gate to the Customer's metered facilities.

Service under this Service Classification shall consist of transportation of natural gas of a Btu content of not less than 950 Btu per cubic foot (dry basis) on a monthly average, supplied at pressures within the limits prescribed by the Public Service Commission.
