INITIAL EFFECTIVE DATE: April 1, 2012

SUPERSEDING REVISION:

LEAF: 189

REVISION: 1

0

Issued in compliance with Order in Case 10-E-0362 dated 03/20/2012.

GENERAL INFORMATION**13. SERVICE CLASSIFICATION RIDERS (Continued)****RIDER N (Continued)****NET METERING FOR CUSTOMER GENERATORS****INTERCONNECTION AND OTHER TECHNICAL REQUIREMENTS (Continued)**

- (K) Stray Voltage in Dairy Barns - Upon receipt of a signed application to interconnect and before any construction takes place, the Company reserves the right to perform a stray voltage investigation. There will be no charge for this stray voltage investigation.
- (L) Reclosers and Single Phasing - The Company practices reclosing. Lines may trip and close several times during a single disturbance. Closing may occur as quickly as 0.2 seconds or as late as five minutes following a trip. Fused circuit laterals are common on rural distribution circuits. Fused laterals increase the possibility of single-phasing. Although these reclosing and fusing practices place no additional requirements on the interconnection, the customer should consider additional protection for the generator.
