Superseding Revision: 1

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER U – DISTRIBUTION LOAD RELIEF PROGRAM – Continued

J. Summer Reservation Payments Program

1. Applicability

A Customer or Aggregator will receive Summer Reservation Payments if such Customer or Aggregator agrees in writing to provide Load Relief for no less than five consecutive hours during each designated Load Relief Period in a specific Tier 1 or Tier 2 Network, up to six designated Load Relief Periods, during the effective Summer Capability Period (“Mandatory Participation”). For purposes of this program, “Network” refers either to a distribution Network or a load area designated by the Company. Participation under the Summer Reservation Payments Program for Tier 1 and Tier 2 Networks, combined, is limited to 400 MW.

2. Applications and Term of Service

Applications for the Summer Reservation Payments Program must be submitted electronically no later than April 1 or, if April 1 falls on a week-end, the first Monday after April 1. The form of application is available on the Company’s website. The Company will not accept an application unless all required information is provided. Each application must state the kW of Load Relief that the Customer or Aggregator contracts to provide. The application may also specify a Verification Methodology.

Participation under the Summer Reservation Payments Program will commence on May 1 if the required metering and telecommunications service (as specified in section E) are installed and operational. If not, service will commence on the first day of the first calendar month during the Summer Capability Period that commences 30 days after the application is accepted and any required metering and telecommunications service are installed and operational. Service will commence no later than July 1 of the current Summer Capability Period.

A Customer or Aggregator may apply in writing to change the CBL Verification Methodology, to reduce the kW of contracted Load Relief in a Network, or to terminate service under this Rider for the current Summer Capability Period provided the request is received no later than May 1. A Customer may apply in writing, no later than July 1, to increase its kW of contracted Load Relief, provided the most recent Performance Factor was not less than 1.0. An Aggregator may apply in writing, no later than July 1, to increase the kW of contracted Load Relief for its existing participant(s) in a Network, provided that the kW provided by the participant(s) during the most recent Load Relief Period or Test Event was no lower than the kW level that the Aggregator pledged for such participant(s).
