

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 03/18/2013

Leaf: 254
Revision: 2
Superseding Revision: 1

GENERAL RULES

24. Service Classification Riders (Available on Request) - Continued

RIDER S – COMMERCIAL SYSTEM RELIEF PROGRAM

Applicable to SCs 1, 2, 5, 8, 9, 11, 12, 13, and 15
(Subject to the provisions thereof)

A. Applicability

To any Full Service or Retail Access Customer taking service under the above SCs, including Customers taking Standby Service; to any customer of NYPA or NYCPUS; and to any Aggregator that meets the requirements of this Rider. Service is available under this Rider only in the New York Independent System Operator (“NYISO”) Zone J.

There are two programs under this Rider under which a Customer or Aggregator may contract to provide Load Relief during Load Relief Periods designated by the Company: the Voluntary System Relief Program and the Summer Reservation System Relief Program. This Rider is applicable to Customers and Aggregators who agree in writing to provide, either on a committed or voluntary basis, Load Relief in a Network during all Contracted Hours required for such Network whenever the Company designates Planned Events during the Summer Period. Participants may also agree to voluntarily provide Load Relief if an Unplanned Event is called.

A Customer must contract to provide at least 50 kW of Load Relief. An Aggregator must contract to provide a total of at least 100 kW of Load Relief in one or more Networks. Each Summer, total participation under this Rider is limited to 200,000 kW. Applications will be accepted on a first come, first served basis.

If other requirements for service under this Rider are met, Electric Generating Equipment may be used to participate under this Rider subject to the provisions set forth in section C below. The participating Customer or Aggregator is responsible for determining that the operation of the generating equipment under this Rider will be in conformance with any governmental limitations on operation.
