REVISION: 0
SUPERSEDING REVISION:

GENERAL INFORMATION

SECTION VIII. EXTENSION OF MAINS CONT'D

6. Private Streets - One Premise

Whenever an applicant makes written application for water service to one premise located on a private street, as hereinbefore defined (Section VIII(1)), the Company may elect to extend its main in accordance with Sections VIII(5) and (10) herein, or to consider the extension as a service line. If the latter election is made, the applicant is to install the service line to his property line and the Company will set a meter at the beginning of the extension to measure all water used. Title to the service will be vested in the customer, who will be responsible for maintenance and replacement, when necessary.

7. Security

The Company may require, from each applicant signing a Main Extension Contract, a deposit in the amount required under the terms of the contract.

When the construction of the extension has been completed and actual costs are known, the amount of the deposit will be adjusted. Refunds will be made in accordance with the Main Extension Agreement.

8. Maintenance and Replacement

The Company will be responsible for the maintenance and replacement of all Company-owned mains located within a public street or Company-owned easements, used to supply water to its customers; and if adequate service requires the reconstruction or replacement of such mains, said mains will be reconstructed or replaced by the Company at its expense.
