SERVICE CLASSIFICATION NO. 1 (Cont'd)

RESIDENTIAL SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

1.8 Micro-Combined Heat and Power or Fuel Cell Generation - Customers that own or operate microcombined heat and power or fuel cell generating equipment, as defined by Public Service Law Section 66-j, may supply their electric load and sell electric energy to the Company as set forth in General Information Section 3.C. The total photovoltaic and farm waste generator load, micro-combined heat and power generator load and fuel cell generator load on Central Hudson's system may not exceed 12 MW.

Customers with micro-combined heat and power or fuel cell generating equipment will be required to pay Central Hudson's actual costs of installation for a dedicated transformer(s) or other equipment up to a maximum of \$350, should it be determined to be necessary for safety and adequacy of service.

In the event that the total rated generating capacity of electric generating equipment that provides electricity to the Company through the same local feeder line exceeds twenty percent of the rated capacity of the local feeder line, the customer owning or operating such equipment may be required to comply with additional measures to ensure the safety of the local feeder line. Wiring and switches of these facilities may be arranged in parallel so as to permit the flow of current from the Customer to the Company and vice versa.
