### SERVICE CLASSIFICATION NO. 2 (Continued)

Table 15 - Arm/Bracket Charge

<u>Arm/Bracket Type</u>	<u>Annual Arm/Bracket Charge, per unit</u>	<u>Annual Charge (\$)</u>
Arm – Standard (over 16 ft.)		
Roadway – steel, all types/sizes		No Charge
Arm – Standard (16 ft. and under)		
Decorative (cane with scroll) – Little Falls		102.36
Bracket - Wood Pole		
Roadway – steel, all type/sizes		No Charge

6. Foundation Charge:

The annual foundation charges per unit are presented below in Table 16. Where applicable, foundations support standards and are placed below grade upon which the standard is mounted. Closed foundations are either cast-in-place concrete and are constructed on site or mechanical, are metal and augured into the ground. Foundation charges are determined by foundation type and size of standard it supports.

Table 16 - Foundation Charge

<u>Foundation Type</u>	<u>Annual Foundation Charge, per unit</u>	<u>Annual Charge (\$)</u>
Concrete – Cast-In-Place (CIP)		
For anchor base standard – (over 16 ft.), double size		131.18
For anchor base standard – (over 16 ft), extra heavy duty		190.13
For anchor base standard – (over 16 ft), traffic signal standard, square steel		457.25
Mechanical - Screw Type (ST)		
For anchor base standard – all applications		102.05

E. Obsolete Facility Charges:

The charges associated with obsolete facilities presented below are applicable to those customers having such facilities in service. Facility charges represent the procurement, installation, operation and maintenance of each facility. The charge for facility service during each billing cycle shall be one-twelfth (1/12) of the applicable annual amounts set forth herein as of the first day of such billing cycle. Additional charges or credits are provided for in the applicable sections of this service classification.

1. Lamp/Luminaire Charge:

The annual lamp/luminaire charge per unit, without volumetric charges and adjustments, are presented below in Table 17. The lamp is the source of light output, also referred to as the bulb. A luminaire is the assembly consisting of the lamp, photocontrol, ballast, reflector, lens(es) and various electrical components and from which the light is emitted. Lamp/Luminaire combinations are billed as such because of their unique lamp or luminaire requirements. Lamp/Luminaire charges are determined by lamp type and size (watts) and luminaire type.
