The quantity refers to all requested lamp locations that can be performed within a specific time period, not to exceed a single work shift for an individual crew within a reasonable geographic area.

4. Relocation of Existing Facilities:

The Company will relocate its street lighting facilities provided that the customer pays the Company the actual costs incurred by Company. Facilities that can be relocated will be limited to standards, arms, brackets, luminaires and lamps. All other facilities are considered permanent and will be addressed as specified within this service classification. The cost shall include all, but not be limited to, labor, material, transportation, administrative and general expenses and other charges and adders applicable thereto.

- a. The relocation of currently operating overhead sourced facilities is limited to any reasonable overhead location within a ½ mile radius of the current location.
- b. The relocation of currently operating underground sourced facilities is limited to any reasonable location along the existing underground street lighting circuit.

5. Permanent Discontinuance:

Upon not less than 30 days' prior written notice to Company, customer may request that any facility be discontinued permanently. Company shall have the right to remove said facilities. If said facilities have been in service for less than 15 years, customer may be required either (a) to continue to pay the applicable charges for such facilities, adjusted as provided in Temporary Operation Discontinuance, F.2 of RATE, for the remainder of an initial 15-year term from the date of installation, or (b) to pay Company the depreciated book cost less net salvage value of such facilities. Net salvage value is defined as the salvage value less the removal cost of the Company facilities removed.
