SERVICE CLASSIFICATION NO. 2 (Continued)

D. Closed Facility Charges:

The charges associated with the closed facilities presented below are applicable to those customers having such facilities in service. Facility charges represent the procurement, installation, operation and maintenance of each facility. The charge for facility service during each billing cycle shall be one-twelfth (1/12) of the applicable annual amounts set forth herein as of the first day of such billing cycle. Additional charges or credits are provided for in the applicable sections of this service classification.

1. Lamp/Luminaire Charge:

The annual lamp/luminaire charge per unit, without volumetric charges and adjustments, are presented below in Table 11. The lamp is the source of light output, also referred to as the bulb. A luminaire is the assembly consisting of the lamp, photocontrol, ballast, reflector, lens(es) and various electrical components from which the light is emitted. Lamp/Luminaire combinations are billed as such because of their unique lamp or luminaire requirements. Lamp/Luminaire charges are determined by lamp type and size (watts) and luminaire type.
