SERVICE CLASSIFICATION NO. 2 (Continued)

RATE:

The charges presented below are applicable to all customers served by this service classification. The charge for service during each billing cycle shall be for facilities in service as of the first day of that billing cycle.

A. Volumetric Charges:

1. Volumetric Energy Consumption:

The unmetered energy, measured in kilowatt-hours (kWh), used by an individual luminaire is dependant upon the corresponding type and size of lamp as identified below in Table 1. The total volumetric kWh consumed during a billing cycle is determined by the following formula.

- a. Aggregate the billable wattage of each lamp in service as prescribed by its type and size, from Table 1-Lamp Billable Wattage, yielding total watts,
- b. Multiply total watts by the prorated portion of the appropriate monthly hours of operation during the billing cycle, from Table 2-Hours of Operation, yielding watt-hours,
- c. Divide watt-hours by 1000, yielding kilowatt-hours.

2. Billable Wattage:

The billable wattages presented below in Table 1, represent values based upon manufacturers' data specific to actual lamp, ballast and control wattages for the designated lamp used within the luminaire facilities as of the effective date of this tariff.
