PSC NO: 1 GAS   LEAF: 176
COMPANY: KEYSPAN GAS EAST CORP. DBA BROOKLYN UNION OF L.I. REVISION: 7
INITIAL EFFECTIVE DATE: 01/05/10   SUPERSEDING REVISION: 6
STAMPS: Issued in compliance with Order in Case 06-G-1186 dated 06/23/09

SERVICE CLASSIFICATION No. 13
Temperature-Controlled Transportation Service (Continued)
(Rate Codes: 730, 731, 732)

Definitions:

1.   Seller notification requirement: The Seller shall provide the Company,
      in writing, with

      a.   Its natural gas schedule for delivery at the city gate, and

      b.   The interstate pipeline used to deliver the gas.

            1)   The information in a. and b. above shall be provided by
                  each day in the timely cycle, and

            2)   Is for the gas day.

2.   Company's Obligations: The Company

      a.   Will deliver to the Customer, its Hourly Quantity during any hour
            unless capacity constraints on its system prevents such delivery;

      b.   May not accept the Seller's and/or Customer's nominations to the
            Company's city gate if the Company has interrupted service to the
            Customer's facilities;

Imbalances in Customer's Account:

The Seller shall schedule deliveries to the Company's City Gate points of
receipt as described in the GTOP Manual, grossed up for UFG, to account for
fuel use and losses in the Company's delivery system.

At the end of each gas day, the Company shall determine whether the total
quantity of gas delivered to the Company's city gate for customers provided
service under SC 7 and 13 is greater than or less than the total quantity of
gas consumed by the SC 7 and 13 customers grossed up for UFG.

      An Aggregate System Underdelivery results when the quantity of gas
      delivered to the Company is not adequate to meet total consumption
      grossed up for UFG.

      An Aggregate System Overdelivery results when the quantity of gas
      delivered to the Company exceeds total consumption grossed up for UFG.

      The Company shall compute an Aggregate Daily Imbalance Percentage by
      taking the absolute value of: 1) the total daily quantity of gas
      delivered to the city gate for SC 7 and 13 customers divided by; 2) the
      total daily quantity of gas consumed by the SC 7 and 13 customers
      grossed up for UFG less; 3)100%.

The Company shall also determine for each customer whether the quantity of
gas delivered to the Company's city gate is greater than or less than the
quantity delivered to the customer. This will be accomplished by comparing
the customer's usage grossed up for UFG to his deliveries resulting in a net
over or under delivery. A daily imbalance percentage will be determined for
each customer taking the absolute value of: 1) the total daily quantity of
gas delivered to the city gate for the customer divided by; 2) the total
daily quantity of gas consumed by the customer grossed up for UFG less; 3)
100%.

Although the Seller's receipts and deliveries will be balanced daily, Seller
will be billed monthly. Daily imbalances will be cashed out as follows:
