

PSC No: 120 - Electricity
New York State Electric & Gas Corporation
Initial Effective Date: January 1, 2010

Leaf No. 40
Revision: 4
Superseding Revision: 3

GENERAL INFORMATION

13. Incubator Development Incentive (IDI): (Cont'd)

For customers who qualify: (Cont'd)

- The Incubator Development Incentive per kWh in effect at the time of qualification, as stated in the Special Provision of the applicable service classification, will be applied to the customer's bill for the duration of the customer's qualification. However, the incentive rate will be subject to periodic (not to exceed annual) review and possible modification, with Public Service Commission approval.
- NYSEG reserves the right to discontinue the availability of this incentive, on one year's notice, upon determination it is no longer economically or financially needed or feasible.
- Upon discontinuation of the incentive, NYSEG will provide the incentive on a pro-rata basis to the remaining qualified tenants for 5 years after the notification of intent to discontinue the incentive provision.
- A qualified customer may choose to take their entire service under Service Classification No. 7, for the duration of the incentive term. At the end of this term the customer may elect either to remain on the SC7 rate, or revert to the otherwise applicable service classification.
- The customer agrees to undergo a NYSEG-supplied energy audit or similar site-specific technical information program and to assess in good faith the resulting recommendations for inclusion in the customer's facility.

Eligibility for Rate Options

Customers qualifying for the Incubator Development Incentive (IDI) on or after July 1, 2003 may select the NYSEG Supply Service (NSS) rate or the ESCO Supply Service (ESS) rate for such qualified incented load. The incentive rate reduction applicable to the qualified incented load under NSS or ESS is set forth in the Special Provision for Economic Incentives of the respective service classifications.
