REVISION: 0
SUPERSEDING REVISION:

GENERAL INFORMATION

34. ECONOMIC DEVELOPMENT PROGRAMS: (Continued)

34.1 Introduction (Continued)

34.1.3 General Program Administration Requirements

34.1.3.1 All customers who participate in an Economic Development Program must agree to the applicable metering and billing options as described under Rule 34.1.4, Provisions for Metering and Billing.

34.1.3.2 All incremental and retained economic development electric load must be served off;

34.1.3.2.1 existing distribution, service and/or metering facilities, or;

34.1.3.2.2 distribution, service and/or metering facilities constructed by the customer, provided they meet Company specifications, or by the Company, as agreed upon within the executed service contract. The Company shall bear material and installation costs for line extensions up to the allowances provided for in 16NYCRR 98.2(j), in the case of an overhead line extension, or in 16NYCRR 98.2(h) or 98.2(i), in the case of an underground extension. In the case of an underground extension installed at the request of the applicant or authorized governmental agency, the allowance should be based on the estimated cost of overhead line provided over the same route as the underground line extension. The applicant shall be responsible for all costs which exceed the portion which the utility is required to provide without contribution.

34.1.3.3 All customers who participate in either Program 1 - EDR or Program 2 - EZR who do not separately meter their load, and all Program 3 - EDPR and Program 4 - PFJR participants are subject to an Incremental Customer Charge. The Incremental Customer Charge is determined by the provisions of the service classification which would otherwise apply, absent the Economic Development program (hereinafter referred to as the parent service classification). The incremental customer charge consists of program specific requirements related to Incremental Metering, Billing, and Administration costs associated with providing these program related services.
