

**PSC NO: 121 ELECTRICITY**  
**NEW YORK STATE ELECTRIC & GAS CORPORATION**  
Initial Effective Date: 09/26/10  
Issued in compliance with Order in Case 09-E-0715 dated 09/21/10

Leaf: 7  
Revision: 3  
Superseding Revision: 1

## GENERAL INFORMATION

4. Non-Standard Equipment:

Lamps, fixtures and other equipment not specifically listed in this schedule will not be provided by the Corporation. The customer may consider installing such lamps, fixtures and other equipment for metered service pursuant to Schedule P.S.C. No. 120 – Electricity or superseding issues thereof.

5. Corporation Maintenance:

Except as provided in Service Classification Nos. 2 and 3 herein, Corporation maintenance will not be furnished under this schedule for any street lighting facilities (lamps, luminaire, poles, street lighting circuitry including conduit and related facilities) which are not owned by the Corporation.

6. Customer Requested Conversion of Existing Lighting:

For Corporation owned lighting, conversion from incandescent or fluorescent light sources to high pressure sodium or metal halide light sources will be made at the Corporation's expense. For conversions from mercury light sources to more efficient light sources with equal or increased illumination, where the luminaires have been in service 15 or more years, the alteration and/or conversion of such luminaires will also be at the Corporation's expense. However, where the present mercury vapor luminaires have been in service for less than 15 years, or where the customer wishes to decrease illumination by more than 25% for any type of luminaire, the customer shall reimburse the Corporation the original cost of such facility removed less accrued depreciation and net salvage (cost of removal less salvage) value of such facility as determined by the Corporation. In any case of such system conversions, the Corporation shall not be obligated to replace in any calendar year, for any customer, more than 5% of its existing number of street lighting luminaires.
