

PSC NO: 2 ELECTRICITY
COMPANY: MASSENA ELECTRIC DEPARTMENT
EFFECTIVE DATE: October 1, 2010

LEAF: 40
REVISION: 0

SERVICE CLASSIFICATION NO. 9 (CONT'D)

DETERMINATION OF ENERGY

The energy amount shall be the total energy (kilowatt-hours) consumed by the premise during the billing period. The energy shall equal the total energy delivered plus the total energy produced, less the amount of energy provided to MED.

ENERGY CREDIT

All customers receiving service under this service classification shall receive a credit on the monthly bill for the kilowatt-hours produced during the billing period. The credit shall equal the kilowatt-hours produced times the average monthly cost of energy purchased by MED, in accordance with the Calculation of the per Kilowatt-hour Energy Credit section of this Tariff.

CALCULATION OF THE PER KWH ENERGY CREDIT

The credit shall equal the total cost of all power and transmission costs billed to MED in each month divided by the total kWh purchases in that month. A statement showing the monthly energy credit shall be filed with the Commission not less than 3 business days prior to the date on which it is proposed to be effective.

CUSTOMER CREDIT

In the event that the Energy Credit received by the customer is greater than charges incurred by the customer during the billing period, a credit will be carried over to the next billing period and used to offset that month's charges incurred by the customer. If a credit remains after the next billing, the credit will be carried over to subsequent billings periods and used to offset monthly charges incurred until fully credited to the customer.
