W. Information Applicable to Transportation of Gas Service: (Cont'd.)

The quantity of gas received by the Company during any one month period for the account of the Customer from each of the Customer's Supplier's shall be the quantity metered at the points of receipt specified in the effective Service Agreement, hereunder, if such receipts are separately measured.

In the event any such point of receipt is also a point at which the Company buys or exchanges gas through the same meter, then the quantity of gas received for the account of the Customer shall be the quantity scheduled by the Company's dispatchers, the Customer and Customer's Supplier, to be received for the account of the Customer at such point during such one month period, subject to reconciliation to reflect actual deliveries.

The quantity to be billed under this Service is the quantity delivered to the Company less an allowance for losses incurred in the process of delivery.

Each month, the quantity to be delivered to the Company and the quantity consumed by the Customer shall be reconciled. To the extent the Customer consumes more than is delivered, the excess gas will be considered to be normal sales and will be billed at the rate specified in the Applicable Tariff Provision for the Service Classification designated for the Customer's meter. Credit for underruns (where the aggregate consumption is less than deliveries of Customer owned gas to the Company) shall carry over for no more than one billing period.

3. Quality of Gas Tendered for Transportation:

Gas delivered to the Company for the account of the Customer by Customer's Supplier shall conform to the quality specifications in the tariff provision for the applicable firm service category. If the gas tendered for delivery to the Company by any such Supplier shall fail to conform, the Company shall notify the Customer of such deficiency and may, at its option, refuse to accept delivery pending correction by the supplier. Should the supplier request that the Company make the changes necessary to bring such gas into conformity with such specifications, the Customer shall reimburse the Company for any and all expenses
