Corning Natural Gas Corporation
Initial Effective Date: 04/01/2008

Leaf: 67
Revision 0
Superseding Revision:

R. Restrictions and Limitations of Gas Service: (Cont'd.)

Company, such dual fuel capability shall also continue to be maintained as a condition of continued gas service.

- (g) Notwithstanding the provisions of this Rule R.1, the Company will not provide service for new or increased commercial or industrial load attachments in excess of 25,000 MCF annually without the written consent of the Company's natural gas supplier and the Public Service Commission. The Company will request such consent upon application by customers or prospective customers meeting the requirements herein set forth and after review of the Company's supply and load situation.
- (h) Customers using 12,000 MCF of gas or more per year who take more gas in any calendar year hereafter than their highest authorized annual consumption in any of the calendar years 1969 through 1975, or their highest permissible consumption pursuant to Rule R.1 shall be charged, and pay, for such excess taken at the following penalty rates:
 - (1) For an overrun of up to 3%, 150% of the rate specified in the second block of the applicable Service Classification, including Gas Adjustment.
 - (2) For the next 2% overrun, 200% of the rate specified in the second block of the applicable Service Classification, including Gas Adjustment.
 - (3) For an overrun in excess of 5%, \$1.00 per CCF.

The above penalty rates are in addition to all other rates and charges payable by the customer; but such penalty rates shall not apply during periods when the supply of gas allows the temporary waiver of customers' limitations.

If excess taking becomes persistent or flagrant, the Company may make application to the Public Service Commission for an order authorizing the Company to terminate all services to such customer.
