SUPERSEDING REVISION: 0

SERVICE CLASSIFICATION No. 4

SUPPLEMENTAL SERVICE - Continued

SPECIAL PROVISIONS:

1. Service is subject to the pertinent provisions of Section 20 as hereinbefore set forth under General Information.
2. Service under this Service Classification shall require monitoring on a daily basis. The expense of installing special meters or other devices necessary to accomplish daily monitoring shall be borne by the Customer.
3. The authorized agents of the Company shall, at all reasonable times, have such free access to the premises of Customers receiving service under this Service Classification as may be necessary to confirm the volume of gas supplied under this Service Classification is in compliance with the Maximum Daily Volume nominated by the Customer.
4. In no event shall a transportation arrangement by which the Company transports Customer-owned gas be construed as an independent source of natural gas for the purpose of qualifying for service under this Service Classification.
5. Customers desiring to take service under this Service Classification must elect to do so in form and manner prescribed by the Company. Customers are further required to enter into a Supplemental Service Agreement with a minimum term of 12 months.
6. Notwithstanding anything to the contrary contained herein, if a Customer (1) qualifies for service under this Service Classification, and (2) has notice from the Company of Service available under this Service Classification, and (3) continues to purchase gas from the Company under any other Service Classification for the purpose of supplementing the Customer's independent source of natural gas, then the Customer will be charged prospectively under this Service Classification and will be deemed to have executed a Supplemental Service Agreement and to have established a Maximum Daily Volume equal to the average daily volume during the Customer's highest volume month in the previous 12 months.
7. The Customer's historic monthly consumption will be used for the purpose of determining whether the Customer's peak usage is during December, January or February. The Company may, at its own expense, install the necessary equipment for determining if the Customer's peak daily usage occurs during December, January or February.
