SUPERSEDING REVISION:

GENERAL INFORMATION

24 REVENUE DECOUPLING MECHANISM ("RDM") ADJUSTMENT (Continued)

(A) Determination of RDM Adjustment (Continued)

At the end of an Annual RDM Period, as defined below, total delivery revenue excess/shortfalls for each service classification group will be refunded/surcharged to customers through service classification group-specific RDM Adjustments applicable during a corresponding RDM Adjustment Period as defined below. The RDM Adjustment for each applicable service classification group shall be determined by dividing the amount to be refunded/surcharged to customers in that service classification group by estimated Ccf deliveries to customers in that service classification group over the RDM Adjustment Period. RDM Adjustments shall be rounded to the nearest \$0.00001 per Ccf.

Following each RDM Adjustment Period, any difference between amounts required to be charged or credited to customers in each service classification group and amounts actually charged or credited will be charged or credited to customers in that service classification group, with interest, over a subsequent RDM Adjustment period, or as determined by the Commission if no RDM is in effect.
