

PSC NO: 119 ELECTRICITY  
NEW YORK STATE ELECTRIC & GAS CORPORATION  
Initial Effective Date: 09/01/03

Leaf: 56  
Revision: 0  
Superseding Revision:

### GENERAL INFORMATION

#### 3. Service Connections: (Cont'd.)

##### E. Inspection and Examination of Corporation- and Customer-Owned Apparatus: (Cont'd.)

###### 3. Meter Testing:

The Corporation will maintain and test Corporation- or customer-owned meters according to NYSEG's internal operating practices and the PSC's rules and regulations. Customers may request the Corporation to make special, unscheduled tests of the accuracy of an installed meter at the customer's expense. The Corporation may elect to test the meter in place at the customer's site or at NYSEG's central test facility.

###### 4. Penalty:

A non-residential customer who, at any time, directly or indirectly prevents or hinders a duly authorized officer or agent of the Corporation from entering the building or location, or from making an inspection or examination, at any reasonable time, may be billed a \$100 penalty charge for each such offense as provided in Section 65(9)(b) of the Public Service Law.

###### 5. Other Rights:

Nothing contained in this section shall be construed to impair a utility's rights as to any other person who prevents access to utility Corporation- or customer-owned meters and/or utility equipment.

##### F. Right of Way:

If required by the Corporation, the customer shall provide, without charge, a suitable right of way from the Corporation's distribution lines to the customer's service entrance.

##### G. Historic Usage Information:

1. At the request of a customer or its designee, NYSEG will, within five (5) business days of the request, provide to such customer, or to its designee, up to 24 months of the most recent historical metered usage information (kWh, kW), including hourly interval usage data for those customers who have contracted with NYSEG to meter and collect such data. Two such requests within a twelve (12)-month period will be provided at no charge. Three or more requests for this information within a twelve (12)-month period will be subject to a charge of \$15 for each request after the second request. Should a customer or its designee request historical metered usage information (kWh, kW) for more than 24 months, NYSEG will provide this information (if available) for a fee of \$15 for each additional twelve (12)-month period or portion thereof. Such usage information will be mailed to the customer's address unless NYSEG receives the proper customer authorization from the Retail Supplier. The fees detailed in this paragraph shall be payable by the requestor.
2. For historic usage requests which exceed NYSEG's basic billing determinants, consistent with the customer's Service Classification, dynamic profile information, or static profile information, the Corporation will cooperate with the customer to provide the specific data, if available, for a fee. The Corporation will calculate and provide the fees involved with this special request.
