

Residential Applicant - Non-Heating

The material and installation costs relating to up to 100 feet of total main and service line (service line measured from the centerline of the public right-of-way, or from the main, if it is closer to the customer and if development will be limited to one side of the right-of-way for at least 10 years), service connections and appurtenant facilities, but not less than 100 feet of main (if necessary) plus the length of service line necessary to reach the edge of the public right-of-way.

Residential Applicant - Heating

The material and installation costs relating to:

- a: Up to 100 feet of main and appurtenant facilities; and
- b: Up to 100 feet of service line (service line measured from the centerline of the public right-of-way, or from the main, if it is closer to the customer and if development will be limited to one side of the right-of-way for at least 10 years), service connections and appurtenant facilities, but not less than the length of service line necessary to reach the edge of the public right-of-way.

Non-Residential Applicant

The material and installation costs relating to up to (a) 100 feet of main and appurtenant facilities; and (b) any service line, service connections and appurtenant facilities located in the public right-of-way.

D. Main Extension Surcharge

If the company, in order to provide service to an applicant, must install mains and appurtenant facilities in addition to those required to be provided without charge under C above, the company will impose a surcharge subject to the following provisions.

- (i) The surcharge relating to mains and appurtenant facilities (including return, depreciation, taxes and maintenance) shall not exceed 20 percent per year of the actual reasonable cost of such facilities that exceeds the portion which the company is required to install without charge to an applicant, if the company lays a main of 4 inches or less in nominal diameter (in the case of low pressure distribution) or of 2 inches or less in nominal diameter (in the case of high pressure distribution). If the corporation lays a main greater than 4 inches in nominal diameter (in the case of low pressure distribution) or greater than 2 inches in nominal diameter (in the case of high pressure distribution), the surcharge shall not exceed 20 percent per year of the estimated reasonable cost of a 4-inch main (in the case of low pressure distribution), or a 2-inch main (in the case of high pressure distribution) unless the estimated consumption of the proposed
