

PSC No:4 Gas
Corning Natural Gas Corporation
Initial Effective Date: 10/01/2003

Leaf: 149
Revision: 0
Superseding Revision:

SERVICE AGREEMENT:

The Corporation and the customer shall execute a Service Agreement in advance of the initiation of transportation service under this service classification.

The Service Agreement shall contain and specify all terms and conditions necessary for the Corporation to provide service to the customer including, but not limited to:

- A. The term of service, including provisions for extension and termination of service.
- B. The exact character of service, including gas volumes, delivery pressures, date service is to commence and period for which service is to be rendered.
- C. The specific receipt point(s) and delivery point.
- D. All incremental facilities required to provide service and any necessary financial guarantees regarding recovery of such investment costs.
- E. A listing of base rate charges to be paid for services rendered.
- F. Provisions under which Buyback of capacity and gas supply can occur.
- G. Gas nomination procedures required by the Corporation.
- H. Treatment of daily and monthly gas imbalances.

Terms and conditions of service included in each Service Agreement required for service hereunder will be established in a manner which does not unduly discriminate between similarly situated customers.

Negotiated Service Agreements between the Corporation and customer will be filed with the Public Service Commission at least thirty (30) days before becoming effective. Contracts filed under this tariff will become effective thirty (30) days after the filing, absent intervention by the Public Service Commission. A summary of each transportation agreement in effect shall be included on a listing appended to this tariff rate schedule, Service Classification No. 11.
