For all off-peak kilowatthours, per kilowatthour:	.02819	.03644
Minimum Charge:	\$26.73	\$27.46

Transition Charge (Non-Bypassable Charge ["NBC"]):

The Transition Charge (NBC) is a per kilowatt-hour charge that will recover specific generation and purchased power-related costs net of credits for the value of generation and purchased power controlled by the Company. Fixed components of the NBC will include the costs of the Company's own generation, transmission related-costs and revenues, allocated uncollectible costs associated with electric supply, the value of the output of the RG&E-owned generation (including energy, capacity and ancillary service value), and the net cost and value of the Nine Mile Point 2 and Fitzpatrick purchased power contracts.

The calculation of the Transition Charge (NBC) applicable to customers served under this Service Classification includes a credit for the benefit of low-cost hydropower purchased from the New York Power Authority ("NYPA"). The forecasted NYPA purchased power contract cost and the forecasted market value of this purchased power will be netted against each other. This net value will then be fixed and streamed only to residential customers.

The remaining components of the NBC (ancillary service costs and the NYPA Transmission Access Charges) will vary and be reconciled on a monthly basis for EPO customers.

A Transition Charge (TC) Statement setting forth the monthly Transition Charge will be filed with the Public Service Commission on not less than three (3) days' notice from the effective date of the revised charge for the first day of the billing cycle each month. Such statement can be found at the end of this Schedule (PSC 19 - Electricity).

ISSUED BY: James A. Lahtinen, Vice President Rates and Regulatory Economics, Rochester, New York
