Rochester Gas and Electric Corporation  
Initial Effective Date: June 1, 2003

Leaf No. 107  
Revision: 0  
Superseding Revision:

## GENERAL INFORMATION

### PART II - RULES AND REGULATIONS

#### 11. ADDITIONAL SERVICES (Cont'd)

##### **B. AUTOMATED METER READING SERVICES**

Distribution Customers may obtain Automated Meter Reading (AMR) Services from the Distribution Provider at a Retail Customer's service point, provided that the meter at that service point is owned by the Distribution Provider. The Distribution Provider's AMR Services will consist of:

- (1) A device (an interval meter that stores real-time data in an AMR recorder) which can be used to determine usage information that is read and transmitted to the Distribution Provider remotely via a telephone line;
- (2) Real-time information including hourly usage on a regular and ongoing twenty-four hour lagged basis, which will be made available to a Distribution Customer on an electronic bulletin board or via an electronic transfer; and.
- (3) A ten (10)-year guarantee on newly installed AMR device capabilities or a five (5)-year guarantee on existing AMR device capabilities.

The Distribution Customer will be charged a monthly fee for AMR Services of \$20.75 for each Retail Customer's service point for real-time hourly information, in addition to any one-time charges associated with installation.

A Retail Customer may continue to use the same metering functionality that is in place at the time of their application for retail access. Retail Customers may request the installation of a different PSC-approved Compatible Meter, with the cost of such equipment and installation to be charged to the Distribution Customer. For AMR services requested by the Distribution Customer, the Distribution Provider will determine what will be necessary for the service based on the following criteria:

- (1) For installation of a new AMR recorder on an existing meter, which is compatible to receive the AMR recorder, the Distribution Customer will be charged a one-time charge of \$1,729.00 for the AMR recorder and installation at a Retail Customer's service point; or
- (2) For installation of a new AMR recorder and a new meter, the Distribution Provider will charge a one-time charge of \$ 2,276.00 for the AMR device and installation at a Retail Customer's service point.

For AMR recorders installed at a Retail Customer's service point prior to the effective date of this Tariff, the Distribution Customer shall have ninety (90) days from the Retail Customer's enrollment date with the Distribution Customer to request that the AMR device remain at the Retail Customer's service point. Upon notification to the Distribution Provider, the Distribution Customer will be assessed a one-time charge per AMR recorder of \$482.00, and the monthly fee of \$20.75. If notification from the Distribution Customer is not received during such ninety (90) days, the Distribution Provider may replace, at the Distribution Provider's discretion, the AMR recorder with a meter compatible with the Distribution Provider's metering infrastructure, at no cost to the Distribution Customer.
