

PSC NO: 121 ELECTRICITY
NEW YORK STATE ELECTRIC & GAS CORPORATION
Initial Effective Date: 10/01/04

Leaf: 9
Revision: 1
Superseding Revision: 0

GENERAL INFORMATION

11. Supply of Service:

The Corporation will use diligence in providing uninterrupted street lighting services but in case the supply of electricity should be interrupted for the purpose of making changes in or repairs to the Corporation's transmission or distribution system, or should fail, in whole or in part, by reason of a flood, fire, labor trouble, accident, Act of God, or any cause beyond its control, the Corporation will not thereby become guilty of any default in its performance under this schedule and will not be liable for any damages resulting therefrom, but the Corporation will be bound in good faith to resume service as soon as reasonably possible.

12. Liability:

The Corporation will not be liable for any injury, casualty, or damage resulting in any way from the supply or use of electricity or from the presence or operation of the Corporation's structures, equipment, wires, conduit, appliances, or devices in connection with the street lighting system, except injuries or damages resulting from the negligence of the Corporation.

The Corporation will only install those facilities requested by the customer and accepted by the Corporation; and, therefore, the customer shall indemnify and hold harmless the Corporation from any and all claims, demands and liability which may be asserted against the Corporation for failure to meet the recommended illumination values set forth in the American National Standard Practice for Roadway Lighting.

13. Application for Street Lighting Service:

A. New Service, New Street Light District or Different Service Classification

Written application for new service, new street light district, or a different service classification is required on the form set forth in this schedule. Such application when accepted by the Corporation, will constitute an agreement between the customer and the Corporation, subject to the terms and conditions set forth in the applicable Service Classification(s). Where unusual expenditures are necessary to supply service because of location or character of the applicant's or customer's installation, facilities will be constructed only when an adequate contribution toward the construction of such facilities, or other satisfactory arrangement, is made. For uniform rules, regulations and general information applicable to this Schedule, refer to Schedule P.S.C. No. 119 - Electricity or superseding issues thereof.
