VI. Service Classification Riders (Available on Request) - Continued

RIDER J

Applicable to Service Classification Nos. 1, 3, and 9
(Subject to the provisions thereof)

Residential Distributed Generation Rate

(B) Definitions: - Continued

(iv) Winter Peak Day Gas Usage and Average Daily Gas Usage:

For determining continued eligibility after the first fifteen months of service hereunder, and annually each year thereafter, Winter Peak Day Gas Usage shall be calculated as follows:

The Customer's Winter Peak Day Usage is the Customer's highest Average Daily Gas Usage occurring during the Winter Period multiplied by a factor determined by the Company to reflect the relationship between the experienced actual Winter Peak Day Gas Usage and the highest Winter Average Daily Gas Usage. Average Daily Gas Usage is defined as the Customer's metered gas usage for the billing period divided by the number of days in the billing period. For a Customer taking gas service under Rate II of this Rider in buildings with five or more dwelling units, the Customer's Winter Peak Day Usage and Average Daily Gas Usage will be based on only the Customer's separately metered DG usage.

(v) **Summer Period** is defined as the period from April 1 through October 31.

(vi) **Winter Period** is defined as the period from November 1 through March 31.
