SERVICE CLASSIFICATION NO. 9

INTERRUPTIBLE TRANSPORTATION SERVICE
FOR GENERATORS OF ELECTRICITY (Cont'd)

Service Agreement:

Company and customer will execute a Transportation Service Agreement prior to the commencement of service hereunder. The Transportation Service Agreement will contain all necessary information for company to supply service to customer including, but not limited:

1. the term of agreement (not less than five (5) years), options for continuing service and options for canceling service;
2. the exact character of service including maximum daily volumes, pressures and customer's equipment to be served;
3. receipt and delivery points, intervening pipelines and suppliers;
4. a listing of all charges to be made for services rendered.

Rate:

Transportation Charge – a transportation charge of \$0.10/Dt shall be assessed on all gas actually delivered to the electric generating facility each day during the month to or for the account of customer.

Marginal Cost Charge – a marginal cost charge of \$0.10/Dt shall be assessed on the gas delivered each month.

In addition to the rate components identified above, customer shall pay a "value component" determined as outlined in Appendix I attached to this service classification.

Load Balancing:

Company will provide from all available sources, to the best of its ability, daily load balancing for differences between the volume measured through the billing meter and the volume delivered each Day (Imbalances).

Company shall keep a record of such Imbalances as described in 2.XI.J. For this service classification, the Daily Tolerance defined in 2.XI.J. shall be plus or minus 2%. Company's charge for such "load balancing" shall be as described in 2.XI.K.3
