## GENERAL INFORMATION

### 2. General Rules, Regulations, Terms and Conditions: (Cont'd)

#### XV. Forms: (Cont'd)

##### D. Form of Application for Outside Gas Service Piping: (Cont'd)

I, the undersigned, request ST. LAWRENCE GAS COMPANY, INC. to install a gas service pipe from its main to my property at the address indicated below, to a meter cock which will be located at the service termination point. I understand that the gas service pipe will be complete with the necessary fittings and connections for installing the meter. Piping from the meter to the appliances will be installed by my contractor. If the house piping is extended by me out of doors to within one foot of the meter outlet, it will be connected by the company without charge to me. If the house piping is more than one foot from the meter outlet, I hereby request the company to extend the piping to the outlet and agree to pay the cost of this extension.

I understand that the outside gas service piping of up to 100 feet of service line measured from the center line of the public right-of-way (or the main if it is closer to my property and development will be limited to one side of the right-of-way for at least 10 years) will be installed without charge to me when done under normal weather conditions. If such piping is in excess thereof, I hereby accept the company's offer to install such excess piping and agree to pay St. Lawrence Gas Company, Inc. for this excess piping at a rate specified by the company when done under normal weather conditions. When installed under winter conditions (as determined by the company) at my request, I understand that I will be charged all costs in excess of what it would have cost under normal weather conditions.

I agree to pay the above gas service piping charges within 30 days after the work has been completed. I further agree that, if the service lateral installed at my request is not in use within four (4) months after the date of installation, I will pay St. Lawrence Gas Company, Inc. for the entire cost of said service. The costs thus assumed by the applicant to the extent they would have been borne originally by the company under the provisions of the two preceding paragraphs will be refunded when gas service is begun, less depreciation at the rate of 3% of such cost per annum for the period which said service lateral has been in the ground.
