GENERAL INFORMATION - Continued

VI. Service Classification Riders (Available on Request) - Continued

RIDER H

Applicable to Service Classification Nos. 2 and 9
 (Subject to the provisions thereof)

Distributed Generation Rate

(A) Applicability:

To non-residential Customers eligible to receive service under Service Classification ("SC") No. 2 and SC No. 9 Rates A(2) and A(4) where the separately metered gas service is used solely for the purpose of the operation of a Distributed Generation Facility with a name plate rating less than 50 MegaWatts and having an Annual Load Factor equal to or greater than 50 percent.

(B) Definitions:

For the purposes of this Rider, the following definitions shall apply:

- (i) **Annual Load Factor** is defined as the Customer's annual gas usage divided by the product of the Customer's Winter Peak Day Gas Usage and the number of days in the annual determination period.
 The formula to calculate Annual Load Factor is:

$$\text{Annual Load Factor} = \frac{\text{Total Annual Gas Usage}}{\text{Winter Peak Day Usage} \times \text{No. of days in the annual determination period}}$$
- (ii) **Distributed Generation Facility** is defined as one or more on-site electric power generating units (including combined heat and power applications) situated at the point of use, where the electricity generated is used solely to supply all or part of the Customer's electrical requirements.
