

PSC No: 120 - Electricity
New York State Electric and Gas Corporation
Initial Effective Date: December 1, 2003

Leaf No. 282
Revision: 0
Superseding Revision:

STANDBY SERVICE RATE
SERVICE CLASSIFICATION NO. 11

APPLICABLE TO THE USE OF SERVICE FOR:

All purposes where all or a portion of the customer's electric power requirement is supplied from an on-site cogeneration or small power producer's generation facilities, and Supplemental, Back-up and/or Maintenance Service, as defined below, is provided by the Corporation. The customer's own generation facilities may be connected with the service of the Corporation for parallel operation, or isolated from the latter by means of a double throw switch. Written application, using the form included in the Corporate Bulletin 86-01, is required.

The Corporation's meters registering sales by the Corporation to the customer will be, at the sole discretion of the Corporation, modified or installed in such a configuration as to prevent reverse registration. Prior to connection and operation, the customer must sign an agreement and have approval from the Corporation relating to the installation of all protective devices required under the Corporation's policy for such service. Prior to interconnection, the customer shall pay for all costs of interconnection and protective devices not recovered through the monthly customer charge contained in this service classification. Appropriate switching and/or metering is required prior to the provision of Supplemental, Back-up and/or Maintenance service by the Corporation.

DEFINITIONS:

SUPPLEMENTAL SERVICE: Electric capacity and energy supplied by the Corporation on a regular basis *to supplement* the customer's power requirement in addition to that ordinarily supplied by the on-site non-utility generation facilities. All customers taking Supplemental Service shall be billed at the appropriate voltage level rate under Service Classification No. 7.

BACK-UP SERVICE: Electric capacity and energy supplied by the Corporation during an **unscheduled** outage of the customer's source of on-site non-utility generation *to replace* power ordinarily generated by the on-site non-utility generation facilities. Customers taking backup service shall notify the Corporation within forty eight hours after the initiation of each outage of the customer's source of on-site non-utility generation.

MAINTENANCE SERVICE: Electric capacity and energy supplied by the Corporation during a **scheduled** outage of the customer's source of on-site non-utility generation to replace power ordinarily generated by the on-site non-utility generation facilities. Maintenance service will be provided for outages:

- a) scheduled with the Corporation pursuant to a power purchase agreement between the Corporation and the customer; or
- b) scheduled with the Corporation 30 days in advance. Maintenance service will not be permitted during the months of December, January, July, and August during on-peak hours. During other periods, the Corporation will not unreasonably withhold approval of maintenance.
