SUPERSEDING REVISION: 0

## GENERAL INFORMATION

### 11. SERVICE LINES: (continued)

- 11.7.2 Company will determine the number of feet of service line to be installed by the Company at no charge in accordance with Rule 10.1 of this schedule.
- 11.7.3 Upon completion of the installation of the Company's portion of the service line as determined in Rule 11.7.2 above, the customer will install the customer portion of the service line to the building wall including the service riser, house bracket, and cap, all of which will be provided by the Company.
- 11.7.4 The Company will ensure by inspection, as necessary, that all construction and material specifications have been met by the customer before the customer's portion of the service line can be joined with the Company's portion and energized.
- 11.7.5 The Company will make the connection between the Company installed service line and the customer installed service line and perform any required tests needed to ensure the integrity of the entire service line.
- 11.7.6 The provisions set forth in 11.4, 11.5, and 11.6 shall be applicable even if a portion of the service line was constructed by the customer.
- 11.7.7 Customer will convey title to the Company of any portion of the service line constructed by the customer for nominal consideration.
- 11.8 The Company shall maintain, replace, and reconstruct the service line which the Company installed or would be required to install if it were a new service line as defined in Rule 10.1. When the customer has installed that portion of the service line from the outlet of the meter to the outside of the building foundation wall, the Company shall leak survey this portion of the service line and report deficiencies to the customer. When the deficiencies have been corrected by the customer, the Company will inspect and verify that the work has been completed in accordance with accepted industry practices.
- 11.9 Renewals of abandon service lines, or enlargements of existing service lines for the purpose of receiving additional service, shall be deemed new service lines and constructed in accordance with Rule 11.2.
- 11.10 The gas delivered to the customer shall be deemed to be in control and possession of the customer at the outlet fitting of the meter.
- 11.11 Whenever the customer constructs a portion of the service lateral, the customer will be responsible for any restoration associated with the customer installed portion of such service lateral.
