COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION REVISION: 3
INITIAL EFFECTIVE DATE: 07/03/01 SUPERSEDING REVISION: 2
STAMPS: Issued in Compliance with Order in C. 00-E-2054 dated April 18, 2001
Cancelled by 4 Rev. Leaf No. 257 Effective 05/01/2002
RECEIVED: 07/02/01 STATUS: Cancelled EFFECTIVE: 07/03/01

SERVICE CLASSIFICATION NO. 13 (Cont'd)

LARGE POWER SUBSTATION AND TRANSMISSION SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

13.4 CURTAILABLE ELECTRIC SERVICE (Cont'd)

- g) A credit determined as the net result of the Curtailable Load Credit applicable under e) above, and penalty under f) above shall be applied to the customer's monthly bill.
- h) Any customer taking service under this Special Provision shall be permitted to operate emergency generating equipment during a curtailment period to reduce his load. The customer and the Company shall agree upon the operating mode, interconnection and equipment specifications.
- i) The Company reserves the right to discontinue availability of this Special Provision to any customer whose curtailment performance is unsatisfactory, in the sole judgement of the Company. Performance will be determined to be unsatisfactory if the customer's rate of compliance with notice of curtailment is less than 50% for two consecutive Curtailment Seasons in which that customer has participated in this Special Provision. The compliance level for each curtailment period shall be defined as the customer's ability to reduce his load by at least 100 Kw.

The result above shall be expressed as a percentage. All maximum Kw values shall be determined on a 15 minute integrated basis.
- j) Once this Special Provision is elected, service must be taken under this Special Provision for three calendar years.
- k) Service under this Special Provision may be terminated by the Company or the Customer with 30 days written notice.

Customer Baseline Load (CBL)

The CBL will provide a reference to verify customer compliance with a scheduled curtailment. The CBL is determined in accordance with the NYISO Day-Ahead Demand Response Program Manual, Calculating Customer Baseline Load for DADRP. For purposes of this program, the customer's average demand measured during the CBL period will be compared to the average actual demand measured during a curtailment. Load curtailments will be measured based on this CBL methodology.
