SERVICE CLASSIFICATION NO. 2 (Cont'd)

GENERAL DELIVERY SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

2.11 HOURLY TIME PRICING PROVISION

Any customer taking service under this Service Classification may elect to purchase 100% of their energy requirements based on charges set on an hourly basis according to the market price of electricity described below. The market price of electricity will be the hourly Day-Ahead Locational Based Market Price (LBMP) as set forth by the New York State Independent System Operator (NYISO) for Central Hudson, Hudson Valley, Zone G (Zone G). The source of the hourly hourly time prices will be the NYISO website for the day ahead LBMP. Such prices will be adjusted by the Factor of Adjustment set forth in General Information Section 29. Customers electing to take service under this Special Provision will not be subject to the Company's Energy Supply Charge.

For each billing period, the Company will calculate the customer's hourly time energy supply cost by applying the hourly day-ahead LBMP price for Zone G to the customer's hourly measured loads. The hourly time energy supply cost will be adjusted to include the customer's prorated share of the monthly charges billed by the NYISO to the Company for Ancillary Services and the NYPA Transmission Adjustment Charge (NTAC). The Ancillary Services and NTAC charges will be based on an average rate per kWh including the Factor of Adjustment set forth in General Information Section 29 and will be applied to the customer's actual monthly usage.

Metering Requirement

In order to take service under this Special Provision a customer must provide an interval meter, with a dedicated phone line, that is compatible with the Company's MV-90 data aquisition system. Customers will be assessed a Monthly Customer Charge of \$123.00.
