SERVICE CLASSIFICATION NO. 13 (Cont'd)

LARGE POWER SUBSTATION AND TRANSMISSION SERVICE (Cont'd)

SPECIAL PROVISIONS (Cont'd)

13.6 POWER FOR JOBS (Cont'd)

Determination of Energy and Demand (Cont'd)

4. The balance of the Customer's total registered demand and energy will be supplied and billed by the Company at the appropriate rates and charges of this Service Classification. The demands to be billed in the on-peak time period shall be the product of one minus the Power for Jobs ratio and the total demand in each of the respective time periods. The energy to be billed in the on and off peak time periods shall be the product of one minus the Power for Jobs ratio and the total kilowatt-hours in the respective billing periods.
5. For a fractional part of a billing period at the beginning or end of service under this special provision, or for fractional periods due to a withdrawal or other change in the Customer's Power for Jobs allocation, the capacity charge and portion of any applicable minimum charge and the amount of energy that will be billed to the Customer under this special provision shall each be proportionately adjusted based on the ratio of the total hours of service under this special provision to the total number of hours in the billing period.

13.7 ENERGY VALUE OPTION PLAN

Effective February 27, 1998, the Energy Value Option Plan (EVOP) will provide Service Classification No. 13 customers with hourly off peak energy requirements of at least 1 MW access to providers of energy other than Central Hudson. The Company has designated 50 MW as the off peak maximum qualifying total load that is eligible under this provision for all S.C. 13 customers. For participating customers, Central Hudson will retain the responsibility of providing adequate capacity, ensuring reliability and maintaining the Company's obligation to serve. Subscribers to the EVOP will continue to receive the benefit of a pro-rata share of the Company's low cost nuclear and hydro energy.

Rate Periods
