Effective date postponed to 11/25/00. See Supplement No. 14
RECEIVED: 12/03/99 STATUS: Cancelled EFFECTIVE: 11/29/00

GENERAL INFORMATION

12. ADJUSTMENT OF RATES IN ACCORDANCE WITH CHANGES IN THE COST OF GAS (Cont'd.)

12.1 GAS SUPPLY CHARGE (Cont'd.)

(B) Average Cost of Gas (Cont'd.)

- (6) Dividing the remainder by the quantity of gas available for sale to retail customers for all service except that supplied on an interruptible (S.C. Nos. 3 and 7) basis during such twelve months. If the Company has included estimated quantities in the average cost of gas computation, an estimate of the gas sales related to the new supplies to be purchased will be added to the quantities of gas sold by the Company during the preceding twelve months.

(C) Alternate Gas Supply Charge Rate

- (1) When the Company must curtail the use of natural gas, the Company will implement its Alternate Fuel Payback Plan as a means of reducing gas consumption. Customers utilizing dual-fuel facilities will be paid the difference between the alternate fuel costs and the equivalent Btu volume of gas priced at their present Service Classification rate including the Gas Supply Charge in accordance with the guidelines set forth below:
- (a) Customers currently having dual-fuel facilities which were installed prior to October 26, 1971, or dual fuel facilities which were voluntarily installed after October 26, 1971 and on or before March 11, 1977 will be paid the difference between the cost of the alternate fuel and the equivalent Btu volume of gas priced at their present Service Classification rate including the Gas Supply Charge.
- (b) Customers voluntarily installing dual-fuel facilities on or after March 12, 1977, will be paid the difference between the cost of the cheapest feasible alternate fuel on the date of installation (as determined by the Company subject to Commission review in the event of controversy) and the equivalent Btu volume of gas priced at their present Service Classification rate including the Gas Supply Charge.
